College of the Siskiyous Instructional Program Review 2017-2018 12/15/2018

- Child Development and Early Education (ECE)
- Patrice Thatcher-Stephens, Program Coordinator Child Development and Early Education, ECE

1. Description of Program:

a) Organization Staffing and Structure:

The ECE—Child Development and Early Education Program is organized as a Career and Technical Education Program under the purview of the Dean of CTE as follows

- President/Superintendent of College of the Siskiyous
- Vice President of Instruction
- Dean CTE
- ECE Program Coordinator and Full Time Tenured Instructor
- Experienced and fully qualified Adjuncts hired on semester by semester basis

b) Primary Purpose:

The primary purpose of the ECE Program at College of the Siskiyous is preparation of front line early educators for work throughout the geographical and expanded online area served by the college. Beyond that, our program serves numerous other vital purposes within in the local and statewide early education and social services community.

- The ECE--Child Development and Early Education Program at College has been part of the Career and Technical Education Area at College of the Siskiyous since the mid 1960's. The program has grown to offer curriculum aligned with 109 other California Community Colleges throughout California.
- Graduates of our program find or advance in their existing employment at Head Start, California State Preschools and in Independent Programs.
- Following the Two Year Course Rotation, students can complete an A.A. Degree in Child Development, a Transfer Degree to any California State University or articulate, as a junior, to Southern Oregon University's online Early Childhood Development Program.
- Our Rotation of Courses offers classes leading to all levels of California State Child Development Permits issues through the California State Department Commission on Teacher Credentialing.
- Our Rotation of Courses offers classes leading to all levels early educator qualifications included in Title 22 Division 12 from the California State Department of Social Services Community Care Licensing, Teacher Qualifications.
- As online degrees have become more accessible, COS, students are currently pursuing the Bachelor's Degrees at National University, Ashford University, Simpson College and Pacific Oaks.
- Many students choose to complete their B.A. degrees in elementary or primary education
- Students often work in early education programs while completing classes for their A.S. degree, Permits, or transfer requirements.
- Our practicum site at Discovery Child Development Center--a collaboration with Shasta Head Start--is the only program in Siskiyou County Accredited by the National Association for the Education of Young Children. Through our work with the California Early Childhood Mentor Teacher Program, we offer additional practicum sites throughout Siskiyou County.
- Until July of 2018 the ECE Program oversaw the Foster and Kinship Care Education Program, a CCCCO designated funding initiative. Under our leadership, this program was recognized as a model of community and statewide collaboration in serving families offering foster care education to underserved families in Siskiyou County.

c) Whom you serve (including demographics)

Geographic Service Area

Siskiyou County, adjacent to Oregon in the northern, inland region of California, is the fifth largest county in the state. More than sixty percent of Siskiyou County's land is managed by federal and state government agencies. These include the USDA Forest Service, the Bureau of Land Management, the U.S. Fish and Wildlife Service, and the California Department of Fish and Game. The county's 6,347 square miles encompass a wide variety of geographic areas and community structures.

Actual Students Served

The ECE Program at College of the Siskiyous serves students, literally throughout this area through our videoconference capabilities. Beyond the two main campus sites—Week and Yreka--Video conference sites have included at various times

- McCloud
- Dunsmuir
- Butte Valley
- Happy Camp
- Scott Valley
- Tule Lake
- Modoc County

Although the actual numbers, i.e. FTES, represented at each of these far distant sites is miniscule, the effects of out preparation is reflected in early educator preparation throughout the region

Siskiyou County is one of the most sparsely populated counties in California. Our students are spread throughout an area averaging approximately seven persons per square mile. Our students are often geographically isolated and served through videoconference sites throughout the county as well as at the main Campus in Weed and our site in Yreka. Our ECE students are both service providers and clients of family support services. The primary employers of College of the Siskiyous Early Childhood Education students are the California State Preschool, as administered through various entities, Head Start and Early Head Start, as administered through four different entities and a few local independent early education programs. We also serve family childcare providers.

Our students range in age and demographics from recent high school graduates living in the on-campus dorms to experienced early educators near retirement age who are challenged to meet the increasing education requirements in our field. Our students are primarily female although we have a representative number of males in our ECE and General Education Classes. In spring 2019 we will have our first male graduate in recent memory. We collaborate effectively with Disabled Student Services to serve eligible students with a wide variety of special needs ranging from cerebral palsy to dyslexia.

Ethnicity

Based on data from the Annie E. Casey Foundation "Kids County Data Center" and most recent census data, the total population of Siskiyou County is approximately 45,000. The child population is approximately 10,000. The overall ethnicity of Siskiyou County is 87% European Descent, 10% Hispanic, 3% Native American, 1.3% Asian American, 1.2% African American, 6.1% Mixed, 1.2% 'other' (Yes, this adds up to over 100%--just referring to data…). Based on 2016 data, distribution of children, 0-5, of European Descent in Siskiyou County is 65%, the percentage of the 0-5 population that is Hispanic is 20%, Native American is 10%, African American is 1.5%, Asian or Pacific Islander 1% and "Other" 8% (again over 100%).

The significant 'take-away' from official, albeit 'sketchy' (that adding up to over 100% thing…) public data is that, in every case, the percentage of the general non-European child population of Siskiyou County exceeds the adult percentages. Per the PIVOT Data from our college research office, our program appears to reflect these trends, although college students have not been encouraged to accurately respond to demographic questions. This alignment is undoubtedly is coincident with the determination of early education programs to recruit and employ educators who accurately represent the ethnic make-up of the families they serve as well as the relative youth of COS students in general.

Socioeconomic Status and Generational Poverty

Lack of higher education opportunity is endemic in rural America and affects both the employment opportunities and life experiences of our students. This is compounded by regional transportation challenges and the challenges of our climate zone. The College of the Siskiyous is a lifeline to county residents. The ECE Program's Video Conferencing, and to a lesser extend online, capability is essential to both the well-being of the current generation of students and the future of the county. While some students struggle to enroll in, complete classes, and pursue additional classes required for Child Development Permits and graduation a substantial number complete local degrees, transfer degrees, and obtain permits. Program data, verified by Child Development Training Consortium Student Profiles submitted to state and federal funding agencies each semester, documents from 10 to 20 students consistently enrolled in classes leading to Child Development Permits. The CDTC numbers reflect only students employed in early education programs while COS.

d and e) Program Services and Methods of Delivery

- We do not provide any Noncredit Courses.
    - Non-credit classes do not meet the academic, permit and transfer needs, of our students.
- We do not provide Basic Skills Courses.
    - Basic Skills classes do not meet the academic, permit and transfer needs, of our students.
    - We *do* value COS's Basic Skills preparation and these courses support out students' success. Through the CDTC subsidy program (see below) we award a cash stipend to qualifying students for Basic Skills units.
- Degree Applicable, Transfer Level and AD-T Classes Face-to-Face/Videoconferenced/Online
    - Local A.A. Degrees
    - AD-T Degrees
    - Child Development Permits at all levels
        - MOI: Face-to-Face/Videoconferenced/Online
        - Delivered through the Instruction Office and
- Supplemental academic support relating to Counseling/Advising
        - Delivered through consistent and collaborative work with COS academic advisors and counselors.

    - Through our consistent Two Year Course Rotation and our ECE @COS Program Guide we offer students a clear road map to meeting their educational and professional goals.

- We provide exemplary support for students with Special Needs and Disabilities.
    - Delivered through collaboration with COS' DSPS program. Thanks!
- Program Coordinator works with ECE Curriculum Alignment Project Work group and monitors CAP alignment at College of the Siskiyous. This initiative led directly to our early approval as an ECE AD-T degree through the CCCCO.
    - Delivered through statewide collaboration with early education partners.
- Student-Centered enrollment tracking and class scheduling.
    - Delivered through consistent monitoring and student survey.
- Siskiyous/ Shasta Head Start collaboration that allows College of the Siskiyous to have an onsite Practicum site at Discovery Child Development Center.
    - Delivered through the establishment of an ongoing COS MOU with Shasta Head Start
- Program Coordinator serves on California early Childhood Mentor Teacher team, working to provide practicum sites throughout the county.
    - Delivered through site evaluations and Mentor/Director Program assessment.
- The ECE Program redesigned the failing Foster Kinship Care Education Program at College of the Siskiyous beginning in 2012 to meet CCCCO standards and meet community needs.
    - Delivered through FKCE embedded in ECE Program 2012—2018.
- Program Director acts as the campus liaison to Child Development Training Consortium making CDTC support available to COS ECE students.
    - Delivered through
        - ✓ Assessment of CHILD Development Permit applications and determination of qualification for CDTC reimbursement.
        - ✓ Processing and submission of Student Profiles and determination of qualification for CDTC unit subsidy.
        - ✓ Attendance at regional and/or statewide consortium meetings as COS CDTC Coordinator.
- Program Director represents College of the Siskiyous on the Siskiyou (formerly Siskiyou-Shasta) Quality Rating Improvement System team.
    - Delivered through collaboration with local partners to implement the QRIS finding through which our county receives state and federal quality improvement funding for early education programs.
- Schedule and organize twice-yearly ECE Advisory Committee Meetings.
- The Program Coordinator prepares and submits College of the Siskiyous ECE Program Annual Report to Siskiyou early education network partners.
- The Program Coordinator designed and acted as Project Director for The Abacus Project a Ford Family Foundation grant, funding an early math family initiative. This initiative has benefitted students directly through curriculum enhancement and indirectly through materials and equipment provided to local early education programs.

f) Curriculum is up-to-date and needs based.

PIVOT STUDENT SUCCESS RATE and FTES

Year	Fall	Winter	Spring	Summer	Notes
2014-15	77.86% 14.26		73.38% 16.36*	89.66% 3.09 FTES	PIVOT Retention Rates always exceed success rates.
2015-16	76.47% 13.34 FTES		75.78% 23.89 FTES	86.36% 4.52 FTES	Abacus funded "Workshop" not-required-for-professionals Success Rates 30% lower.
2016-17	82.58% 15.17 FTES		78.80% 25.38 FTES	88.24% 1.85 FTES	Increasing FTES Greater Success
2017-18	82.56% 18.25 FTES	71.43% .24 FTES	85.71% 23.97 FTES	MISSING** est >85%	Increasing FTES
2018-19	85.71 18.51 FTES				Increasing FTES Greater Success

*anomalous

Historic Context

The ECE Program has become more demanding over the past decade. Historic Success Rates were higher in ECE classes throughout the CCC system prior to the full implementation of the Curriculum Alignment Project after 2009. As the field required a more complete academic preparation, and California Community College ECE programs committed to this higher standard, our COS courses went through a complete curriculum review leading to both CAP alignment and our first wave AD-T degree.

At the same time, the ECE Program at COS became early adopters of online LMS's, first ETUDES and now Canvas. As in online education in general, we found that online students represented a different demographic than Face-to-Face/Videoconference students.

We, oddly, took a little pride in the C+, slightly above 'average', success rates that our students achieved as we first implemented this more rigorous curriculum and as we assumed the challenges of online instruction. However, ever committed to continuous improvement, we also understood that, along with the more challenging curriculum and new delivery method, we needed to offer new and better student preparation, monitoring and support.

Indicators of Curriculum and Structure Updated Based on Student Need and Assessment Data include:

- Curriculum
  - The ECE Program created a less cumbersome program with the decrease of degree units for the local AS from 32 to 24. This unit requirement aligns more accurately with other CCC's and with the ECE Classes required for the AD-T Degree.
    - This decrease in units increased our number of graduates with both local A.A. degrees and ADT-T degrees.
    - Since the change in required units, our graduation numbers have increased significantly.

- Ongoing and Integrated SLO Assessment has allowed us to monitor and assess our program ability to offer students class assessments and experiences reflecting course AD-T aligned SLO's.
  - Each year, for each class, a designated SLO is assessed aligning class assessments and experiences with the designated SLO.
  - Monitor the integration of classes that share similar SLO's. As part of this process we:
    - Design MOA's that accurately assess student understanding at all levels of Bloom's Taxonomy.
    - Scaffold and/or redirect students who might have failed in the past by carefully monitoring individual student status at census.
      - ✓ More accurate retention and success rates for ECE classes reflects this ability, but we are still working on both scaffolding students who are struggling and moving students to more developmentally appropriate classes before the first census date to avoid the appearance and reality of late withdrawal and failure.
- We have used ongoing and systematic SLO and PLO assessment to
  - Alignment with statewide "CAP" and AD-T standards for ECE programs.
  - Maintain and Align classes within our COS curriculum to reflect a common philosophy.
  - Align classes within our COS curriculum to build upon a common knowledge base.
  - Focus our work with students on both career goals (employment after completion) and transfer goals (articulation and transfer rates).

g) Provide a breakdown of the classes offered in your areas within the Program Review cycle.

The Program Review Cycle at College of the Siskiyous has inconsistent over the past four years. As always, ECE, as a Career and Technical Education programs has completed a program review every two years—however the required format has been inconsistent. In the alternate years, we have used an Annual Update reflect on the progress toward two-year goals; review our SLO assessment rotation and MOI's.

Quite honestly, since COS' our Planning Committee was reorganized in 2017, I have lost track of our ALO planning. Our Continuous Quality Improvement Plan (CQIP) is inherent in our Annual Update review.

ECE Classes by Semester Classes required for degrees are in BLUE
SLO Assessment for the 2016-2017 and 2017-18 focused on, aligned SLO's 2 (2016) and 3 (2017) for all classes. See COR's.

Fall Classes

ECE 1001 Introduction to ECE Principles, Practices and Standards: This is the introductory class. It is a CORE class required for the A.S./A.S.-T/Permits/Title 22 requirements. It is offered every fall face-to-face and videoconferenced. Very seldom it is offered in the summer, online.

ECE 1002 Child Development: This is a CORE class required for the A.S./A.S.-T/Permits/Title 22 requirements. This class also satisfies the G.E. Social Sciences requirement. It is offered every fall face-to-face and videoconferenced. It is also often offered online, typically in the spring.

ECE 1003 Child, Family and Community: This is a CORE class required for the A.S./A.S.-T/Child Development Permits/Title 22 requirements. This class also satisfies the G.E. Social Sciences requirement. It is offered every fall face-to-face and videoconferenced. It is not offered online.

ECE 2000 Observing and Assessing--Desired Results and Developmentally Appropriate Environments:

This class is required for the A.S./A.S.-T/Advanced Permits. It is an advanced class—students should complete, or be enrolled in, the majority of their CORE classes before enrolling in this class. It is offered every fall face-to-face and videoconferenced. It is not offered online.

ECE 2002 Child Nutrition Health and Safety: This class is required for the A.S./A.S.-T/Advanced Permits. It is an advanced class—students should complete, or be enrolled in, the majority of their CORE classes before enrolling in this class. It is offered every fall face-to-face and videoconferenced. It is not offered online.

ECE 1999 Human Development: This class is NOT required for the A.S./A.S.-T/Child Development Permits. However, it does satisfy a CORE class requirement (can replace ECE 1002) for the Child Development Permit. This class also satisfies the G.E. Social Sciences requirement. It is offered most falls online and every spring face-to-face and videoconferenced.

ECE 2003 Serving Children and Families with Special Needs: This class is NOT required for the A.S./A.S.-T/satisfies Master Teacher Permit specialization. It is offered in the fall online.

ECE 2527 Supervision of Adult Staff in Early Education: This class is NOT required for the A.S./A.S.-T/required for Site Supervisor or Program Director Permits/required for Mentor Teachers. It is offered in the fall online.

ECE 0958 ECE Lab: This is a one or two unit lab-only class. This class is NOT required for the A.A./A.S.-T/required as one extra lab unit for Southern Oregon University Articulation. It is offered most semesters.

Spring Classes

ECE 1500 Introduction to Curriculum: This is a CORE class required for the A.S./A.S.-T/Child Development Permits/Title 22 requirements. It is offered every fall face-to-face and videoconferenced. It is sometimes offered online, but is not regularly scheduled as online.

ECE 1501 Positive Child Guidance: This class is NOT required for the A.S./A.S.-T/ applies to Master Teacher Permit Specializations. It is offered in the spring online.

ECE 1502 Serving Children and Families in a Diverse Society: This is a class required for the A.S./A.S.-T/ applies to Master Teacher Permit Specializations. This class also satisfies the G.E. Diversity requirement. It is offered every fall face-to-face and videoconferenced. It is sometimes offered online, but is not regularly scheduled as online.

ECE 1999 Human Development: See Above

ECE 2500 Family Relationships and Parenting: This class is NOT required for the A.S./A.S.-T/ applies to Master Teacher Permit Specializations. However, it does satisfy a CORE class requirement (can replace ECE 1003) for the Child Development Permit. This class also satisfies the G.E. Diversity requirement. It is offered in the spring online.

ECE 2501 Administration: This class is NOT required for the A.S./A.S.-T/ required for Site Supervisor or Program Director Permits/required for Mentor Teachers. It is offered in the spring online.

ECE 2502 Practicum: This is a class required for the A.S./A.S.-T/ Child Development Permits. This is a lecture/Lab class requiring 6 per week hours of work in an approved early education program. The California State Department of Education and Community Care Licensing Department of Social Services requires that students satisfy immunization requirements. See most current Update on following pages.

ECE 2510 Creative Art Activities: This class is NOT required for the A.S./A.S.-T/ applies to Master Teacher Permit Specializations. It is offered in the spring online.

ECE 0958 ECE Lab: See Above

2. External Factors with Significant Impact: What external factors have a significant impact on your program?

a) Budgetary constraints or opportunities

The Child Development and Early Education, ECE, Program is an important program with both local and statewide recognition and value. We are a relatively inexpensive program. Nevertheless, our experience has been that the program is undervalued within the COS monetary structure. Quite frankly, I suspect that the cost of a tenured faculty person as a Program coordinator is not fully appreciated as a benefit to the college and community, and that our innovative and thrifty use of an aging temporary building as an exceptional lab school, in collaboration with, and fully staffed by, Shasta Head Start is, likewise, under appreciated.

We place the direct monetary needs of students and DCDC first, with the majority of our costs reflecting this perspective. Our minimal district funding is typically used exclusively to support the lab school, Discovery Child Development Center and out students and classes who use that program as a clinical site. Through strategic purchase of materials, we ensure that students can observe and practice concepts taught in our classes.

We receive other student support funding through the Child Development Training Consortium, based on units earned by students who are employed within the early education community and completing work toward their Child Development Permits. Rather than redirecting this funding to administrative or materials needs for the program, we consistently pay student the full CDTC subsidy to offset the cost of their education.

The grant funding which we have received is used for programs or initiatives which directly benefit both COS students and the surrounding community.

In the past, we have received Perkins Funding through a Career and Technical Education area administered funding request and award formula. This avenue of funding has been removed from availability for the ECE Program over the past 5 years.

We do rather well with limited resources. With this Program Review, I will for the first time in many years, include a budget request.

b) Competition from other institutions

We prefer to collaborate rather than compete. The majority of ECE programs and degrees at CCC's throughout California are aligned. Many have classes available online. Of course, we welcome transfer students form other CCC's. We offer our own aligned classes online and meet students enrolled at our cohort colleges online. When helpful and appropriate we refer our students who need classes outside our Course Rotation to those cohorts.

On the other hand, the promulgation of for profit online institutions, while not specifically affecting our core program, increasingly affects the quality of the course of study available to educators, and early educators. Online education is great. Accessibility is important. The methods and tools of teaching in early education and primary cannot be adequately absorbed online.

c) Requirements of four-year institutions

Because our program is aligned through CAP and is an AD-T program with an articulation agreement with Southern Oregon University, we benefit for the oversight and rigorous academic requirements included in those agreements.

d) Institutional regulation, policies, standards, and other mandates

The Child Development and Early Education Program at College of the Siskiyous prepares student for Title 5 Child Development Permits issued through the California State Department of Education Commission on Teacher Credentialing. Beyond the course work required for our local A.A. and AD-T degrees, we offer classes fulfilling the CTC requirements. Our program offers classes meeting the Title 22 Department of Social Services Community Care Licensing requirements for teachers employed in independent early education programs.

In addition to offering these classes, we direct students to appropriate 'permit' classes, scaffold permit application and refer students to sources of funding as appropriate.

Child Development Permit Matrix –College of the Siskiyous Classes Meeting Education Requirements for Matrix Option 1	
Assistant Teacher	6 units of any ECE COS classes (2 3-unit classes)
Associate Teacher	Required: 1002 Child Development OR 1999 Human Development/1003 Child, Family and Community OR 2500 Family Relationships and Parenting/1500 Introduction to Curriculum Plus: One more 3-unit class
Teacher	Required: 1002 Child Development OR 1999 Human Development/1003 Child, Family and Community OR 2500 Family Relationships and Parenting/1500 Introduction to Curriculum Plus: Five more 3-unit classes Plus: 16 units of degree applicable General Education Units (in any of the following: English/Math OR Science/Social Sciences/Humanities OR Fine Arts)
Master Teacher	Required: 1002 Child Development OR 1999 Human Development/1003 Child, Family and Community OR 2500 Family Relationships and Parenting/1500 Introduction to Curriculum Plus: Five more 3-unit classes Plus: 16 units of degree applicable General Education Units (in any of the following: English/Math OR Science/Social Sciences/Humanities OR Fine Arts) Plus: 6 units of ECE Specialization (Classes can be 'double counted'). See Master Teacher Specializations on following pages. Plus: 2527=2 units of Adult Supervision
Site Supervisor	Required: AA (or 60 units) in ECE including: Required: 1002 Child Development OR 1999 Human Development/1003 Child, Family and Community OR 2500 Family Relationships and Parenting/1500 Introduction to Curriculum Plus: Five more 3-unit classes Plus: 2501 Administration AND 2525 Staffing=6 administrative units Plus: 2527=2 units of Adult Supervision

e) Non-Institutional regulations, policies, standards, and other mandates

Within both California State Title 5 and Title 22 requirements DOJ and California State Penal Code requirements may affect our students' application of Child Development Permit application or employment in a DSS CCL center or program.

Students participating in our clinical Practicum classes must comply with California State SB792 requiring immunizations of all employees and volunteers in a childcare setting who provide "care and supervision" of children. These immunizations include influenza, pertussis, and measles.

Nationally, Head Start Standards inform our course content and SLO's. These standards apply to students whose employment goals include Head Start. Since Siskiyou County is the home of three separate agencies with Head Start grants, Head Start standards significantly affect education and employment in our area.

The National Associate for the Education of Young Children is the professional organization setting the standard to Best Practice in early education. The CAP alignment project reflects NAEYC standards and guides CCC ECE programs. Additionally the NAEYC through the National Academy of Early Education is the nation al accrediting body for early education programs. Discovery Child Development Center is the only NAEYC Accredited early education program in Siskiyou County. Based on this accreditation our students are given an opportunity to receive clinical practicum practice in a center where Best Practice is a standard.

The California State Department of Education's Transitional Kindergarten initiative has affected CCC ECE programs as primary and elementary teachers return to community colleges to qualify for work with younger children in these classrooms. We have created pathways specifically designed for credentialed primary teachers and have welcomed them into our child development and early education classes.

f) Job Market

Requirements of prospective employers reflect the legal and educational requirement outlined above. Locally, our successful students are almost fully employed. Many students obtain entry-level jobs before starting ECE classes. Additionally prospective employers value a familiarity with our rural community and the growing diversity of Siskiyou County children.

Unfortunately, with the exception of Head Start and California State Preschool programs Siskiyou County employers often underpay and provide no benefits to new graduates. Fortunately, most COS graduates gain experience and/or their B.A. degrees and move into higher paid Head Start or State Preschool jobs.

In regard to the Job Market, development in the field (both current and future) will continue to reflect the increasingly rigorous standards in early education. It is anticipated that, in California, a very long anticipated renovation of Title 5 and Title 22 standards will reflect the influence of the Transitional Kindergarten Initiative and community standards. If this change occurs, CCC ECE classes and community early education programs will adapt, once again, to changing standards,

3. Progress on Outcomes Assessment

Since our December 2017 Annual Program Review Update the ECE program has continued our ongoing progress on Program Learning Outcomes and Student Learning Outcomes. Please see response to this section, including improvements made as a result of our ongoing assessment, appropriately included in section 1.f.

In January 2018, on Planning Day, the faculty attended training on Program Learning Outcomes. I attended believing that I knew all there was to know about SLO's and PLO's. I was reminded that not all instructors had been here since the beginning of time, and needed this training. Turns out, I learned a lot. I then began work on "ECE Program Learning Outcomes v2" integrating PLO's with specific SLO's.

Unfortunately, getting Elumen online as the Curriculum Committee vehicle for approval took longer than anticipated and my teaching and program coordination work got in the way of v2. This reworking will be added to our SLO assessment rotation plan over the next 4 years

4. Institutional Program Effectiveness Indicators:
Please discuss your program's performance on each program specific data item provided by the Research Office.

PIVOT Retention Please see section 1.f

PIVOT Success Please see section 1.f

Student CRN Data: Although this data is super interesting, as much as I tried I did not see any outstanding or surprising trends. Online students are over all less successful by percentage, and summer students on line appear to be more successful by percentage. I would hypothesize that this is a combination of on line detachment, summer-session student commitment, and time to focus on individual classes. No disparity between fully time faculty and adjunct faculty.

Importantly, Student Success and Retention—although notably low for Online Classes is comparable between Videoconferenced and Face-to-Face classes. **I am proofing this Program Review on the afternoon of December 15th after our College Day activities on December 14th. I was appalled by a presentation by otherwise supportive and collegial colleagues. Their breakout group apparently took it upon themselves to analyze (with no data and little experience) the Video Conference/FTF MOI.** I have no clue what this is about, beyond, possibly personal negative experiences. And, I agree, most faculty are unable or unwilling to do the work necessary to expertly teach VC classes. If COS spent one tenth of the time training, supporting, and assessing videoconference instructors as we do online instructors this MOI would succeed. Without that support, it will die and, with it, our ability to use individually appropriate practice for student cohorts.

PIVOT High School Date Again, interesting not surprising. The overwhelming preponderance of Yreka High School students supports the ECE Program's home at the Yreka site and the primacy of Yreka, as the county seat and home of the Siskiyou County Office of education. The availability of, and success in, all ECE classes via videoconference negates an argument that the program location determines student enrollment.

PIVOT Race Data Please see discussion in section 1.c

PIVOT Gender Data Yup, we fail miserably. Actually when Perkins looks at us, we fail *way* more than this data would indicate. The majority of males are those enrolled in our G.E. Social Sciences classes. Please see Four Year-Action Plan and Continuous Quality Improvement Proposal

Modality and Time Something that the ECE Program does especially well is scheduling and modality. Videoconference classes offered at times appropriate to our target population allow us to serve both campuses and, thereby, create intercampus cohorts that remain intact as students move into jobs throughout the counties. This class size also sustains student participation and engagement and creates a sense of community beyond the COS student body.

FTES Please see discussion 1.f

PIVOT Assignment Type As it has been since the beginning…the ECE Program is 40/60 Fulltime/Adjunct. We do fine. I spent my first ten years at College of the Siskiyous arguing for another full time instructor. Once we actually got on the hiring list. However, I understand that this is not a priority. We are a low FTES program and it is a monetary decision. As the argument goes, full time instructors are invested, connected and supportive in ways that those with other 'day jobs' just cannot be. Our students, the community and the program would benefit from that. On the other hand, our adjuncts are well qualified, connected to the community and hard working. Enough said.

Institutional Program Effectiveness Indicators:

a) Use the data provided by the Research Office to discuss your current Course Completion Rate and then set a Course Completion Rate goal for your future program review cycle. Please see Four Year-Action Plan and Continuous Quality Improvement Proposal.

b) Use the data provided by the Research Office to discuss your current Course Success Rate and then set a Course Success Rate goal for your future Program Review cycle. Please see Four Year-Action Plan and Continuous Quality Improvement Proposal

5. Other Unit-Specific Quantitative and Qualitative Research: Please provide

a) A list of any quantitative or qualitative measures not provided in the previous questions that you have chosen to gauge your program's effectiveness (e.g., transfers, degrees, certificates, satisfaction, student contacts, student headcount, Perkin's data, equity data, etc.)

Child Development Permits California offers six levels of Child Development Permits, each with its own set of issuance requirements and each authorizing the holder to perform different levels of service in child development programs. The State Permits are issued by the California Department of Education, the same agency that issues Teaching Credentials for Public School Teaching. Permits are required if you work for a school that is funded by the Department of Education or Head Start.

The ECE Program at College of the Siskiyous does not award "Certificates" rather we encourage and scaffold students' application for a CCT Child Development Permit. These permits, unlike certificates, are recognized in early education and qualify students to work in early education programs. Each year 7-10 current or former COS students apply and receive Child Development permits.

Perkins Data is collected through the federal government in support of the Carl D. Perkins Career and Technical Education Act of 2007. Data is sourced from community colleges, trade schools and other state and county agencies. The COS CTE area has been in the past, actively engaged in collection and dissemination of this data. For the past five years, data has not been, to my knowledge, actively collected, nor has data been

disseminated to CTE programs, including ECE. This year has seen a new determination in the CTE area to share collected data and a CTE Perkins representative has contacted CTE programs, including ECE. We appreciate this interest. However, as one might suspect the data is complicated and not always convincing.

The assembled data was shared with me, as Program Coordinator. As a result, I understand that our program is failing to meet Non Traditional student equity goals. This is understandable. ECE is a 'woman heavy' profession for historic and economic reasons. Our ECE Advisory Committee is aware of this concern and inclusion is one of our program goals. Please see Four Year-Action Plan and Continuous Quality Improvement Proposal.

Perkins employment data was likewise disappointing. Unlike the Non Traditional Student data, the ECE Advisory and I do not believe this data is representative or valid. When we question it, we were told that it is complicated and hard to understand. I am not bad at data assessment. I look forward to communication that is more consistent and an opportunity to investigate data sources. Anecdotal and survey data for the ECE program shows that ECE students are often already employed, and that those who receive Child Development Permits of Degrees are nearly fully employed upon completion.

Solutions to lack of reliable data include current initiatives through CCCCO—specifically Vison for Success which specifically notes Credentials/Permits as measure of success, development of program specific surveys to accurately assess graduate employment rates, Strong Workforce data, Siskiyou County Office of Education records of Child Development Permit applications, and cross referencing of COS Registrar's Office graduation data.

b) A summary of the results of these measures indicates that Child Development Permits are important and valuable indicators of student success. Additionally accurate data that reflects employment is necessary.

c) What did you learn from your evaluation of these measures, and what improvements have you implemented or do you plan to implement as a result of your analysis of these measures? Please see Four Year-Action Plan and Continuous Quality Improvement Proposal

6. Evaluation: Based upon and not repeating the descriptions you provided in Question 1 and the responses provided in Questions 2 – 5, please provide an analysis of what is going well and why and what is not going well and why, in any of the following areas that are relevant to your program:

a) Representativeness of population served

In regard to Ethnicity and Race, our population is very representative and appropriate for those working desiring to work I nearly education in Siskiyou County or the Northern California region. In regard to gender, we are representative of current practice and intend to investigate ways to mediate for lack of nontraditional students.

b) Alternative modes and schedules of delivery (e.g., online, hybrid, early morning, evening services)

G.O.A.T.! ECE had a long history of getting to students where they are when they need classes. Please see Four Year-Action Plan and Continuous Quality Improvement Proposal.

c) Partnerships (internal and external)

Externally ECE@COS is a recognized model of collaboration. In a huge county, with few people, agencies learn to work together. Internally, we would very much like to see CTE become a more collaborative program. There is special interest in an area of Family and Community Service, connecting ECE and the Alcohol Drug and Human Services Program. It remains a mystery, and regret, that the Foster Kinship Care Education Program, once a strong part of the ECE Program has been removed from our oversight.

d) Innovation and implementation of best practices

In early education, Best Practice is embedded in everything that we do. The educational philosophies that we teach in our classes guide our work as educators. Assessment, Observation and Evaluation are as central to each class session as they are to our students' work with children and families.

e) Efficiency in operations

We are efficient. See our budget and class scheduling.

f) Efficiency in resource use

See above.

g) Staffing

Please see 4. PIVOT Assignment Type

h) Participation in shared governance (e.g., do unit members feel they participate effectively in planning and decision-making?)

The Program Coordinator has a long history of active and involved participation in shared governance. Adjunct Instructor and Program Coordinator interact often and meet each semester to plan and assess.

i) Professional development and training

Through professional organizations, NAEYC, CDTC, PITC, ESTEM, QRIS, Head Start, CCCECE and others the Program Coordinator and Adjunct Instructors remain current and active in local, state professional development.

j) Compliance with applicable mandates

The ECE Program is currently in compliance with internal and external program mandates.

7. Vision. Tell us your unit's vision: Where would you like your program to be four years from now? Dream big while considering any upcoming changes (e.g., new buildings, labs, growth, changes in the discipline, etc.)

We visualize that the Child Development and Early Education Program will maintain its role as an aligned and committed member of the CCC ECE community. We will continue to serve our students, and the children and families in Siskiyou County and to collaborate with the myriad of agencies that are part of our network.

We hope to expand our aligned and mapped courses to allow us to serve students within the context of workforce development which is heavily invested in alignment and mapping. Our core course will remain constant. However as the field grows and expands to meet greater demand, both for services and for skills, We will add additions course of study options to meet, those needs.

It is the current Program Coordinator's hope that within the next four years there will be an opportunity to apply for and receive a semester sabbatical leave, and work with the Harvard Institute for Children and Family and Adverse Childhood Effects Training. This will support our dreams.

It appears that the program will continue to thrive and serve the needs of children and families in Siskiyou County. "Dreaming Big" please see the bullet points below.

- In the 6 year Program Review completed at the end of 2006, the year after the current ECE Program Coordinator was hired, you will find a detailed and well thought out proposal for a Child Development Center/Siskiyou Institute for Children and Families that is not a thirty-year-old temporary building.
- Included in the Child Development Center is the concept of SCOE/COS collaborative North and South County Therapeutic Nursery Schools, ergo the long delayed sabbatical during which the current Program Coordinator intends to develop Child Trauma Screening protocol (and training) COS and SCOE.
- Collaboration between the Early Childhood Education Program and the Alcohol Drug and Human Services would benefit children and families throughout the county and speak to the former bullet.
- Beyond adequately staffing the ECE Program, maintaining our connection to the CCC ECE cohort, continuing to provide excellent education for early educators, building a 'real' child development

center, establishing comprehensive therapeutic nursery schools to address early the childhood trauma that is rampant in this county, that's about all.

8. Progress on Prior Goals: Briefly summarize any progress your unit has made in meeting the goals and objectives identified in the program's last Four-Year Action Plan.

See Below in BLUE. This is from the 2013-2014 Program Review. Updated comments in BLACK

LONG-RANGE PLANNING

- Taking into account the trends within this program and the college, describe what you realistically believe your program will look like in three to five years, including such things as staffing, facilities, enrollments, breadth and locations of offerings, etc.

Long Range Planning: I suspect that we will look very much the same. The requirement for early educators is at equilibrium and/or increasing slowly and steadily according to workplace date. Education requirements set 15 years ago by major agencies are beginning to stabilize with increased articulation to four-year-institutions.

In the past 10 years, the program has grown, stabilized and met statewide CCC standards. We have instituted the CAP standards and the AS-T degree. We prepare students to apply for fund application s for Child Development Permits. The proposed Early Education Credential will increase relevancy and enrollment in the ECE programs statewide that are prepared to speak to these requirements.

Long Range Planning Goals:

- Clarify and Condense SLO's in classes with more than 5 SLO's and Continue SLO Assessment in all courses while supporting **2018** ✓
- Development of Complete Program Description capabilities in Curricunet **2018 NA**
- Institute "Assessment by Exam Score" for first semester ECE classes to assure that students who are unprepared do not choose to enroll and fail to succeed. **2018 NA**
- Revise Southern Oregon University Articulation Agreement to align with CSU AS-T Degree. **2018** ✓
- Continued consideration of decrease of required units for degree to align with AS-T 24 unit degree requirements. **2018** ✓
- Continued conversation with CCCCO CTE re use of permits—rather than certificates-- as indices of Student Success **Ongoing**
- Continued conversation with COS data programmer re non-representative ECE data entry. **2018 NA**
- Investigate Cohort and Program organization models that will increase Enrollment and Student Success. **Ongoing**
- Institute Program wide "Census Drop Standards". **2018** ✓
- Institute Videoconference Standard of Pedagogy designed to improve responsiveness in all videoconferenced classes to the needs of students at the non-face-to-face sites. **2018** ✓
- Receive designated fund supported support in FKCE Budget tracking and adequate support from the COS Business Office. **2018 NA**

Goal: ECE COS is nearly maxed out in regard to growth and effectiveness—beyond what is realistically proposed in this report. We need significant administrative support. If we have a committed, active (beyond pursuit of grant funding) CTE Dean who will liaison effectively with CCCAOE, NFN and CCCCCO the program can grow. If we have that support, the Program Coordinator can focus effectively on adjunct support, child development center interface, course review, assessment, recruitment and student support.
2018 It looks as if this is about to happen, four years later. This lack of leadership has been challenging.

9. Four Year-Action Plan and Continuous Quality Improvement Proposal (Goals, Objectives, Resources, and Actions):

Reflecting on responses to the previous questions, the ECE **Four-Year Action Plan** includes unrealized progress goals included in our previous Academic Program Review:

Specific Program Goals formulated to maintain or enhance program strengths and to address identified challenges are included here.

2014 Pending Long Range Planning Goals, Objectives, Resources and Actions formulated in 2014 to maintain or enhance program strengths and to address identified challenges.

- Continued conversation with CCCCO CTE re use of CTC Permits—rather than CCCCO certificates-- as indices of Student Success. Alternatively reinstitute Certificates in addition to Permit qualification.
    - 2018: We have discussed this with the COS President, acting Dean CTE for ECE. This goal will be much easier to achieve with dedicated CTE administrative support, i.e. new Dean of CTE.
        - Goal: Mediate the negative assessment/funding effects of prioritizing Permits over Certificates while maintaining our emphasis on CTC Permits as best practice.
            - Objectives
                - Reinstate CCCCO 6-18 unit Certificates
                - Granted comparable CCCCO Certificates to students and former students who have qualified for, applied for, and received their Child Development Permits.
            - Resources
                - Perkins liaison-- Clarification of Perkins indices
                - Curriculum Committee—submission to CCCCO
                - CTE and Registrar Administrative Support—identifying and contacting students.
            - Actions
                - Submit proposal to Curriculum Committee
                - Curriculum Committee submits to CCCCO
                - Update list of current and past COS students who have received Child Development Permits.
                - Submit list to CTE Dean, Office of Instruction and Registrar.
                - Issue Certificates
- Investigate Cohort and Program organization models in order to increase Enrollment, Student Success, and Retention.
    - 2018: We discussed this initiative with the ECE Advisory at our spring meeting. The committee supports this format of instruction.

- Goal: Streamline and facilitate student success and retention in ECE Program classes.
    - Objectives
        - Arrange the program into cohorts enrolled in a series of three 6 week classes each semester in order to maximize preparation and completion or the course of study.
    - Resources
        - Clarification from Financial Aid, Counseling and Scheduling in regard to the next steps and/or barrier to implementing this format.
        - Counseling and Advising support in presenting the change in the most accessible way possible to current and future students.
    - Actions
        - Publicize Classes
        - Schedule Classes
        - Collaborate with all instructors re delivery.
        - Reflect changes in ECE@COS information

New 2018 Long Range Planning Goals formulated to maintain or enhance program strengths and to address identified challenges. In addition to the ongoing Goals above

- Goal: The ECE Program looks forward to being a part of the renewal of the Career and Technical Education area under a new dean.
    - Objective
        - Participate vigorously in Perkins initiatives and meet Perkins standards for success and retention.
    - Resources
        - Perkins specialist in collaboration with CTE Deem
    - Actions
        - Increase Non-Traditional Enrollment
        - Use Perkins Funding to allow our program to hire assistance to map courses in order to attract non-traditional students to workplace via our classes.
- Goal: Continue to maintain a model early childhood program at Discovery Child Development Center and in ECE@COS which exemplifies Best Practice in early education and the education of early educators.
    - Objectives
        - Maintain NAEYC Accreditation
        - Create outdoor space which reflects standards taught in our ECE Program
        - Offer trained Student Worker staffing to allow the Discovery Child Development Center staff to meet the needs of our practicum students.
    - Resources
        - District Budget support to pay the portion of the accreditation fees for which COS is responsible per our MOU.
        - District or Perkins funding which allows ECE@COS to contribute to the upcoming renovation of the outside play area.
        - Perkins funding to support one student worker
    - Actions
        - Hire a CTE Dean

        - Continued collaboration with Shasta Head Start per existing MOU
        - Outdoor renovation per existing maintenance request.
- Goal: Map ECE Programs to the Early Childhood Educator's Mapping Tool
    - Objectives
        - Use the web-based ECE Competencies Mapping Tool to compare their courses and trainings with the ECE Competencies.
    - Bring College of the Siskiyous into alignment with CCC ECE Programs using this tool as indices of Best Practice in community college education. Through the mapping process, faculty can determine how thoroughly competencies are addressed within our curriculum and program.
    - Resources
        - Perkins Budget support to support hiring of adjunct faculty person to align our Core Courses to the ECE Competencies Mapping Tool
    - Actions
        - Hire Adjunct to begin project
        - Complete mapping of CAP Classes
        - Submit to Child Development Training Consortium for review.
- Goal: Maintain currency and access Distance Learning Methods of Instruction
    - Objectives
        - Online Classes
            - Continue to maximize current rotation of Canvas appropriate ECE classes to attract optimum enrollment.
                - Align online ECE Program courses with OEI standards to increase access for a broader student base.
            - Continue to use the Videoconference format to offer FTF/Videoconference sections of ECE classes throughout Siskiyou County.
                - Collaborate with COS Distance Learning to use of most efficient and accessible videoconference LMS, e.g. transition from video bridge to "Zoom".
                - Support colleagues from other areas of instruction in appropriately utilizing this MOI.
    - Resources
        - CCCCO supported OEI training and certification
        - COS Distance Learning Staff
    - Actions
        - Beginning in spring of 2019 ECE instructors will begin to align appropriate classes with OEI.
        - Beginning in spring of 2019 ECE instructors will participate in training to maximize our use of emerging platforms.

PLEASE SEE REQUIRED CQIP FOLLOWING INCLUDED AFTER SIGNATURE.

I certify that the ECE Program Review process included broad dialogue about student learning, program effectiveness, and resource allocation.

Operational Unit Program Review Continuous Quality Improvement Proposal (CQIP) ***Resource:***

Child Development and Early Education CTE Program

Operational:

Board Policy? ☐ Yes ☐ No Administrative Procedure? ☐ Yes ☐ No

Fiscal:

✓One-time Funds ☐ Ongoing Funding

Issue: *Briefly describe the issue*.

In order to maintain a model early childhood education program exemplifying Best Practice in both early education and the education of early educators at Discovery Child Development Center the ECE Program at College of the Siskiyous is requesting the following resources:

- Funds for NAEYC—National Academy for the Education of Young Children—reaccreditation:
  - Per section 1.f of our Head Start, College of the Siskiyous current 2017-2021 Memorandum of Understanding with Shasta is responsible for ½ of the cost of the annual DCDC accreditation update fee.
  - We are requesting $300.00. in addition to our typical District Funding.
- Funds for developmentally appropriate "Movable Pieces" for DCDC outdoor activity area:
  - In late fall of 2017 we became aware that the, always less-than-developmentally-appropriate 25 year old climbing structure in the DCDC outside area showed signs of structural damage.
    - In collaboration with Shasta Head Start, the ECE Program Coordinator requested that the structure be removed with full costs paid by SHS. This request was approved by the, then, VP Student Learning and VP Administrative Services.
      - The structure was not removed because an appropriate time could not be agreed upon.
  - Beginning in late summer of 2018 SHS administration and ECE@COS Program Coordinator again met and began longer term planning for this project.
    - We have now agreed upon a process and appropriate timeframe.
    - ECE@COS is requesting an increase in our District/Perkins funding to allow us to support the purchase, in collaboration with SHS, of "Movable Pieces" which reflect Best Practice in Outdoor play.
  - We request $5000.00 in addition to our typical District funding.
- Funds to employ a qualified Student Worker to assist Discovery Child Development Center staff to meet the needs of our practicum and observation students.
  - Each year ECE students use DCDC as their observation and practicum site. We are able to do this because DCDC staff, fully paid by SHS assist and supervise their work in collaboration with COS instructors. A student worker provides the assistance available to allow SHS staff to assist us.
    - In the past, we have used Perkins funding to support this.
    - Recently we have either been unable to provide assistance or have used the entirety of our District Funds to pay
    - In fall of 2018, the COS Fire Program graciously allowed us to transfer necessary funding from their unused funds to hire a student worker.
  - We request $1500.00 in addition to our typical District funding.

- Funds to employ adjunct faculty person to map ECE Programs to the Early Childhood Educator's Mapping Tool
    - This will bring College of the Siskiyous into alignment with CCC ECE Programs using this tool as indices of Best Practice in community college education. Through the mapping process, faculty can determine how thoroughly competencies are addressed within our curriculum and program.
    - We request $3000.00 in Perkins funding for this one time initiative.

Vision/Mission/Institutional Master Plan Alignment:

From the current college Mission Statement:

COS provides accessible, flexible, affordable, and innovative education leading to associate degrees, certificates, college transfer, career and technical education, workforce training, and basic skills preparation.

Career and Technical Education Programs typically require a more costly infrastructure than LAS Programs. ECE@COS has been innovative and collaborative, over the past 2 decades, and has been able to avoid expensive capital expenditure and has minimized staffing costs. It is time to support our ability to access the best education possible by supporting these requests for funding in the pursuit on Best Practice

Program Review Objectives:

- Goal: Continue to maintain a model early childhood program at Discovery Child Development Center and in ECE@COS which exemplifies Best Practice in early education and the education of early educators.
    - Objectives
        - Maintain NAEYC Accreditation
        - Create outdoor space which reflects standards taught in our ECE Program
        - Offer trained Student Worker staffing to allow the Discovery Child Development Center staff to meet the needs of our practicum students.
    - Resources
        - District Budget support to pay the portion of the accreditation fees per MOU.
        - District or Perkins funding contribute to the renovation of the outside play area.
        - Perkins funding to support one student worker
    - Actions
        - Hire a CTE Dean
        - Continued collaboration with Shasta Head Start per existing MOU
        - Outdoor renovation per existing maintenance request.
- Goal: Map ECE Programs to the Early Childhood Educator's Mapping Tool
    - Objectives
        - Use the web-based ECE Competencies Mapping Tool to compare their courses and trainings with the ECE Competencies.
        - Bring College of the Siskiyous into alignment with CCC ECE Programs using this tool as indices of Best Practice in community college education. Through the mapping process, faculty can determine how thoroughly competencies are addressed within our curriculum and program.
    - Resources
        - Perkins Budget support to employ adjunct faculty person to align our Core Courses to the ECE Competencies Mapping Tool
    - Actions
        - Hire Adjunct to begin project
        - Complete mapping of CAP Classes
        - Submit to Child Development Training Consortium for review.

Background: Please see above.

Rationale: It is important that our CTE Practicum and Observation sites reflect the content of our academic classes and Best Practice in early education.

Budgetary Impact: This request reflects increased budget funding for a successful and long term CTE Program and aligns with an approved MOU.

Resource Allocation Adjustments (if any): I suggest that the COS Career and Technical Education area proceed with alignment with Perkins Funding Guidelines. I believe that the materials requested for the outside play area qualify as one-time funding per Perkins guidelines.

Recommendation: I highly recommend that College of the Siskiyous commit itself to the support of this program. Supporting program which we already have, which have shown the ability to find collaborative funding in the past, and which serve the local community as well as COS students, should be a priority
