1. Description of the Program

The official mission of the Library is "to meet the learning needs of students and the learning and instructional needs of faculty and staff by providing access to information and knowledge." Our mission statement goes on to describe how we will achieve this, by providing "the best possible collections, support services, training, technology and facilities to assist students and staff in achieving success in accordance with the overall mission of the College." In addition, we serve as an outreach area of the college by working "cooperatively with local public and school libraries and other organizations to serve the information and cultural needs of the community."

The Library functions with a staff of just three people:

- Marcia Eblen, Library Technician (12 month, Classified)
- Linda Kiely, Library Technician (12 month, Classified)
- Jude Baldwin, Librarian (195 days, Faculty)

Library staff reports to the Dean of Liberal Arts & Sciences in the Office of Instruction.

As our mission statement mentions, the Library primarily serves College of the Siskiyous students, faculty, and employees. We secondarily serve our community members who are not currently enrolled in classes.

The Library serves our campus by providing collections and resources relevant to campus needs. Collection materials can be physical or electronic. Physical collections include books, reserve textbooks, audio recordings in a variety of formats, DVDs, maps, periodicals, and ephemera. Electronic collections include online articles, ebooks, and streaming videos; these are usually packaged together and accessed as a database.

Resources are all the non-collection ways that the Library supports our campus and include library employees and the variety of assistance we provide, online information, facilities, and equipment. Library employees provide support of all kinds including reference/research assistance, computer tech support, staff-mediated services such as interlibrary loan (ILL), and classroom instruction. The Library manages the content on a portion of the COS web site where we provide general FAQs, self-serve how-to information regarding research in the form of handouts and videos, and information to support faculty.

As a facility, the Library offers quiet study space, a group study room, and a casual "lounge" area that allows food and serves as an event space. The Library space also provides a home for our physical collections as well as staff areas and storage. Our space contains necessary equipment such as computers, printers (black & white and color), copier, scanner, microfilm reader, and media players.

The Library collaborates with classes across the curriculum to support student research needs. In the last four years the Faculty Librarian has conducted 148 class visits in disciplines ranging from English to Biology. Class visit content varies based on the needs of the research assignment. The Library reaches an average of 1,240 students each academic year through these classes as well as tours, workshops, and other activities. Library tours conducted as either part of a class or as a SOAR or other campus tour totaled 66. The Library offered workshops through the Student Success Seminar series in the ASC for several years until they were suspended. We reached additional students through 81 "other" instructional activities such as offering general orientations for classes and the Lodges; being an interactive class scavenger hunt stop; and the faculty librarian serving as in-class resource during hands-on class research time.

	AY15-16	AY16-17	AY17-18	AY18-19	totals
Class visits	40	35	25	48	148
Library tours	20	2	25	19	66
Workshops	8	0	0	0	8
Other	12	48	3	18	81
total	*80*	*85*	*53*	*85*	*303*
student participants reached	1,312	1,318	919	1,412	4,961

The Library looks for opportunities to build partnerships both on- and off-campus that will benefit both the College and our community. Some recent examples include:

- *Partnership with the COS Writers Club to host events:* Writers Club Open Mic Night and Poetry Night events regularly draw up to 50 attendees and is a great way to draw new people into the Library. It gives our students a creative outlet for expression and helps them to build public speaking skills and the courage to share their work and ideas. We hope that it also generates excitement about literature, poetry, and reading! These public events support the College vision for "cultural and community enrichment" and the Library's mission to "serve the cultural needs of our community."
- *Partnership with the Music Department:* The Library has partnered with the Music program to organize and re-house their instrumental sheet music. This will make the sheet music a more usable collection and the Music program will not spend funds unnecessarily on sheet music they already own.
- *Partnership with the Siskiyou County Library:* In order to leverage our very different collections and limited budget, the Library now partners with the county library system, allowing books to flow more easily between the two entities. Students can have public library materials sent to the COS Library for pickup and public library patrons can have COS materials sent to their local branch for pickup. COS students can also apply for a free public library card and have instant access to all of the county library system's online collections. The Library has also been a partner for Siskiyou Reads, a non-profit organization affiliated with the public library system that encourages all county residents to read and discuss a book in common.
- *Participation in the statewide migration to new library software:* In consultation with groups around campus, the COS Library agreed to join 109 other California community college libraries in migrating to a new library services platform (LSP). The chosen LSP is the same system used by all CSU libraries, as well as SOU, OIT, Oregon State University libraries, and some libraries in the University of California system. While each library will have local customizations, the system works the same at all libraries, easing the transition for transferring students. It will also save the College money for many years.[1]

The Library provides these resources and services to all students and employees year round with a small budget that is only 1.1% of the College's expenditures. Other than staff, our collections (primarily in Capital Outlay), which include databases and the software required to manage them, are our largest expenditures.

[1] It is estimated that Library LSP costs will be approximately cut in half in FY20-21 and FY21-22, saving the college about $13,000 annually. The LSP contract does not offer any firm costs after that date but costs should continue to be much lower than if we had stayed with our current software system.

Percent of COS Expenditures Spent on the Library							
	COS FY2018-19 (Final)			Library FY2018-19 (YTD)			% of COS Budget
	Unrestricted	Restricted	Total	General	Lottery	Total	
Academic Salaries	$5,803,865	$432,591	$6,236,456	$78,022	$0	$78,022	1.3%
Classified Salaries	4,668,092	1,135,407	5,803,499	87,865	0	87,865	1.5%
Employee Benefits	5,048,706	756,988	5,805,694	89,171	0	89,171	1.5%
Supplies	296,250	244,816	541,066	1,070	3,091	4,161	0.8%
Other Operating Expenses	4,989,770	1,586,057	6,575,827	21,691	0	21,691	0.3%
Capital Outlay	402,740	1,196,988	1,599,728	1,439	19,887	21,326	1.3%
Other Outgo	375,673	538,352	914,025	0	0	0	0.0%
TOTAL	$21,585,096	$5,891,199	$27,476,295	$279,258	$22,978	$302,236	1.1%

2. External Factors with Significant Impact

The Library budget has been relatively flat for the last four years and we have only needed to make minor cuts to cover our rising operating costs. We have been fortunate enough to receive some funding from Instructional Equipment (AY17-18 for a new microfilm reader; AY19-20 for some new furniture), Perkins (Spring 2018 to update our agriculture collection), and Foundation Mini-Grants (AY15-16: marketing banner; AY17-18: portable display stands; AY18-19: sound system for Lounge events).

The Library has continued to lose personnel during the last four years. In November 2016, Nancy Shepard, Assistant Dean of Learning Resources retired. As a dean overseeing several campus areas, Nancy was necessarily less involved in day-to-day management than her predecessor, retired Library Director Dennis Freeman, but her degree in Library Science and her office location in the Library has meant that her presence is missed. Operating with just three staff members can be limiting; in particular, with our one faculty librarian managing day-to-day operations since Nancy's retirement, instructional support can sometimes be limited. Projects these limitations have impacted include:

- Expansion of self-serve instructional web site content
- Expansion of content for and at the request of faculty
- Expansion of student employee training program in Canvas (possibly expanded to a "customer service" badge students can put on their resumé)
- Creation of a credit-bearing research skills and/or information literacy course(s). These skills not only help our students succeed as students but will help them meet employer expectations for new employees.[2]
- Creation of cross-references in our collection to increase use of materials
- A greater physical presence on the Yreka Campus

The Library's main rival in the realm of research is the Internet and the inaccurate (overly positive) self-assessment many students have regarding their research skills. Both employer expectations and the

[2] Head, Alison. *Learning Curve: How College Graduates Solve Information Problems Once They Join the Workplace*. Project Information Literacy, 2012. https://www.projectinfolit.org/

need for library research skills for classroom success makes direct instructional opportunities and other instructional outreach and support especially important.

3. Outcomes Assessment

During this time period the Library had three Student Learning Outcomes (SLOs). Below is each SLO along with its assessment plan and assessment results.

SLO 1: Students who receive formal research instruction provided by the COS Library will be able to effectively locate needed information using a variety of library resources.

Assessment: Various methods such as post-session evaluations, post-class surveys, and in-class worksheets and activities; question on the Annual Student Survey

Time Frame for Assessment: Throughout the semester

How will we know this SLO has been met?: This SLO will have been successfully achieved when the most recent Institutional Set Standards as agreed on by the Academic Senate are met as measured by:

- students answering post-session surveys "strongly agree" or "agree" to survey questions tied to this SLO, *or*
- students completing worksheets are rated "✓+" or "✓", or
- student grades on worksheets or assignments

The most recent Institutional Set Standards as agreed on by the Academic Senate:

- Transfer courses (such as ENGL 1001): ≥67%
- Credit courses (such as ENGL 0900): ≥67%
- Basic Skills courses (such as ENGL 0850): ≥45%
- Vocational Courses: ≥70%

Assessment Results:
Since AY15-16, the Library has collected assessments from 34 classes, primarily ENGL 0900 and ENGL 1001. During this time period the Library conducted evaluations after 25 class visits. Students consistently report that the Library visits helped them to feel more confident in all of these areas, meeting the institutional set standards. Post-class visit evaluations typically include questions similar to the following, asking students to rate their confidence in their ability to find the research materials they need for their assignments:

- The Library visits helped me to feel confident that I can get to the Library web site and databases page
- The Library visits helped me to feel confident finding articles in EBSCO[3]
- The Library visits helped me to feel confident choosing keywords for a topic
- The Library visits helped me understand how search techniques such as using **""**, *****, and **OR** can improve search results

[3] EBSCO is the vendor who provides most of our article databases.

Students also actively demonstrated that they understood the concepts presented in class by successfully completing worksheets in twelve classes.

The Library also teaches research skills to students one-on-one in the Library and through a variety of educational materials on our Research Help page. This instruction is more difficult to assess. The Library attempts to collect feedback through a question on our Annual Student Survey which is collected in the Library, Student Center, and Lodges on the Weed Campus, the Main Office and/or ASC on the Yreka Campus, and online (using a Survey Monkey link posted on our web site and shared with online instructors). Results from this question show that the Library is meeting this SLO since 82-89% of students feel that the Library helps them to develop their research skills.

		2015	2016	2017	2018	2019
The library provides information and instruction for students to help them develop good research skills.	Strongly Agree	51%	45%	54%	50%	56%
	Agree	31%	41%	27%	33%	33%
	Neutral	14%	8%	15%	11%	8%
	Disagree		1%	1%	3%	
	Strongly Disagree			1%		2%
	Don't Know or N/A	3%	4%	1%	3%	2%

SLO 2: Students who participate in formal research instruction will be able to evaluate for credibility information provided by the library, Internet resources, and other information sources.

Assessment/Time Frame for Assessment/How will we know this SLO has been met?: The Library does not often have the chance to support this SLO in formal instruction sessions. It will be assessed appropriately if the opportunity arises using the methods and standards outlined in SLO #1.

Assessment Results: Not assessed.

SLO 3: Students who use the COS Library and utilize its resources, services, and formal instruction will appreciate the value of libraries in supporting academic and/or career success and in supporting life-long learning.

Assessment: Question included on the library's Annual Student Survey

Time Frame for Assessment: Around National Library Week in April (voluntary survey participation in the Library, at other locations on the Weed and Yreka campuses, and online)

How will we know this SLO has been met?: This SLO will have been successfully achieved when 75% or more of students surveyed "strongly agree" or "agree" to the Library Student Survey question about appreciating the value of libraries.

Assessment Results: All survey results in the last six years show that we are easily and consistently meeting this SLO: 88% - 100% of students "strongly agree" or "agree."

		2014	2015	2016	2017	2018	2019
Having used the COS Library's resources, services, and instruction, I appreciate the value of libraries in supporting student success.	Strongly Agree	86%	78%	64%	66%	63%	78%
	Agree	4%	22%	30%	22%	34%	20%
	Neutral	4%		6%	6%	3%	
	Disagree						
	Strongly Disagree	4%			1%		2%
	Don't Know or N/A				3%		

Four-year assessment plan

The Library has had these same three SLOs for a very long time and we would like to reevaluate and possibly revise or change them. There has been some discussion about whether the Library should have student learning outcomes (SLOs) or program learning outcomes (PLOs) and the current Student Learning Outcome Manual is in flux. We look forward to continued outcomes discussions. In the meantime, we will continue to use our existing SLOs and will follow a similar assessment plan.

1. **Students who receive formal research instruction provided by the COS Library will be able to effectively locate needed information using a variety of library resources.**
    - *Assessment:* Various methods such as post-session evaluations, post-class surveys, and in-class worksheets and activities; Annual Student Survey question
    - *Time Frame for Assessment:* Throughout the semester
    - *How will we know this SLO has been met?:* This SLO will have been successfully achieved when the most recent Institutional Set Standards as agreed on by the Academic Senate are met as measured by:
        - ◊ students answering post-session surveys "strongly agree" or "agree" to survey questions tied to this SLO, *or*
        - ◊ students completing worksheets are rated "✓+" or "✓", *or*
        - ◊ student grades on worksheets or assignments
        - ◊ ≥75% of Annual Student Survey respondents "strongly agree" or "agree"

      The most recent Institutional Set Standards as agreed on by the Academic Senate:
        - ◊ Transfer courses (such as ENGL 1001): ≥67%
        - ◊ Credit courses (such as ENGL 0900): ≥67%
        - ◊ Basic Skills courses (such as ENGL 0850): ≥45%
        - ◊ Vocational Courses: ≥70%

2. **Students who participate in formal research instruction will be able to evaluate for credibility information provided by the library, Internet resources, and other information sources.**
    - *Assessment/Time Frame for Assessment/How will we know this SLO has been met?*: The Library does not often have the chance to support this SLO in formal instruction sessions. It will be assessed appropriately if the opportunity arises using the methods and standards outlined in SLO #1.

3. **Students who use the COS Library and utilize its resources, services, and formal instruction will appreciate the value of libraries in supporting academic and/or career success and in supporting life-long learning.**
    - *Assessment:* Question included on the library's annual student satisfaction survey
    - *Time Frame for Assessment:* During National Library Week in April (voluntary participation in the Library, at other locations on the Weed and Yreka campuses, and online)
    - *How will we know this SLO has been met?:* This SLO will have been successfully achieved when 75% or more of students surveyed "strongly agree" or "agree" to the Library Student Survey question about appreciating the value of libraries.

4. Institutional Program Effectiveness Indicators

Not applicable or covered in other sections (especially 3 and 5).

5. Library Quantitative and Qualitative Data

The Library collects a wide variety of statistics. The following include some of the data that we have found meaningful when looking at three broad areas of Library operations: our collections, research services, and our physical space.

Use of the Library's Collections

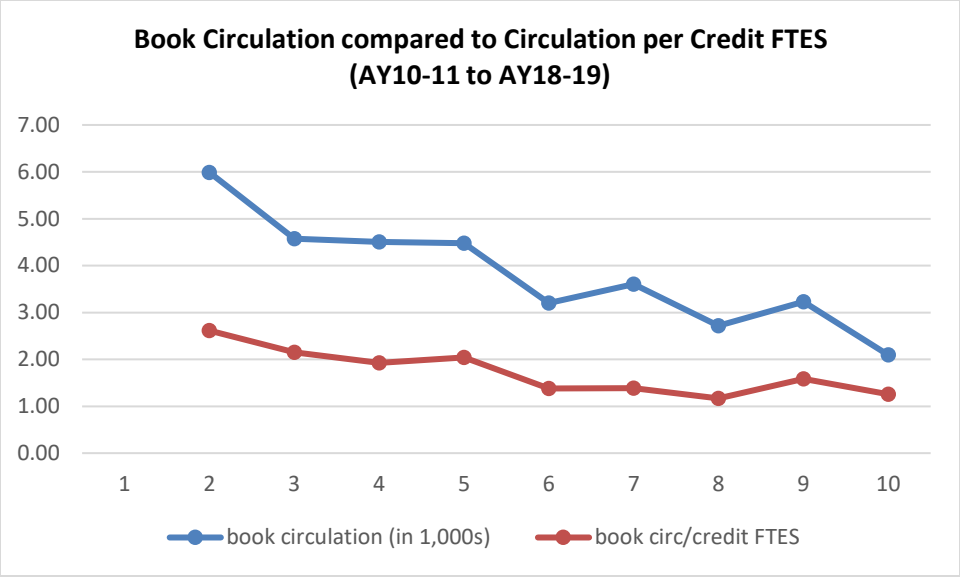
The Library tracks circulation statistics, which are the number of item checkouts each year. In general, academic libraries are seeing overall circulation go down[4] and COS is no exception. The trend is not as grim as it first appears, however, since FTES have been declining during the same period: the number of books circulations may have gone down but so has the number of students available to check them out. Total circulation per credit FTES, including reserve textbooks, has actually remained fairly steady.[5]

Book Circulation by Academic Year

Academic Year	2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19
book circulation transactions	3,101	2,455	1,921	1,857	842	1,316	1,017	1,845	839
reserves circulation transactions	2,887	2,121	2,586	2,618	2,362	2,291	1,701	1,386	1,255

[4] Anderson, Rick. "Print on the Margins." *Library Journal*, vol. 136, no. 11, June 2011, pp. 38–39. *Academic Search Complete*, https://siskiyous.idm.oclc.org/login?url=http://search.ebscohost.com/login.aspx?direct=true&db=a9h&AN=61428301&site=ehost-live&scope=site

[5] Credit FTES were used for this comparison because a large portion of current noncredit FTES are generated from our FIELD ISA, a student population with no access to our physical collection. FTES data is from DataMart.



We think that recent reserve textbook use is decreasing in part because of the prevalence of book voucher programs on campus through Siskiyou Promise and categorical programs such as EOPS. In response to feedback from faculty and students, the Library worked for several years on our Program Review goal of having a reserve textbook collection in Yreka. We tried to find categorical funds to pay for these extra books but were unsuccessful. The Library now maintains a small collection of reserve textbooks on the Yreka Campus from the Library's budget. This collection has not been very successful, however: since the collection was first made available in Fall 2018, only one book has ever been checked out. The Library has done sporadic marketing of this collection but these dismal numbers indicate that we need to find a better way to reach Yreka students or discontinue funding this collection.

The Library has done a better job at marketing our new books. In January 2018 the Library moved the main service desk in order to free up a prime location to showcase new books and other displays. Thanks to a Foundation Mini-Grant the Library was able to purchase new book display shelves to assist in promoting items in this area. A simplistic look at circulation statistics show that 31 percent of new books published between 2016-2019 (190 out of 616 titles) have circulated. By comparison, 13 percent of our entire collection[6] circulated during the same time period (3,701 circulations of 29,390 items). These calculations are overly simplistic since some titles circulate more than once, some new books are "checked out" for interlibrary loans, some exceptions are made and non-circulating titles are checked out, etc. While it is a very rough comparison, it does seem to indicate that print is not dead at the COS Library and that it is worthwhile to continue to buy and market new titles.

As use of physical books declines, the use of online resources has grown. Our largest online collections (not including article databases) are the ebook collections *Ebook Central* (49,288 titles), *EBSCO eBook Collection* (21,336 titles), and *Credo Reference* (917 reference book titles) and the streaming video collection *Films On Demand* (36,138 film titles). *Films On Demand* (*FOD*) saw a significant jump in use during the time period when COS switch from Etudes to Canvas for our online courses. The Library

[6] Excludes reserve textbooks and non-circulating items such as reference books

worked with Distance Learning so that Canvas would offer instructors a convenient and easy integration of *FOD* videos into their online classroom. It seems likely that this generated extra use as instructors explored *FOD* for appropriate class videos.

Ebook & Films On Demand Use Statistics

	AY14-15	AY15-16	AY16-17	AY17-18	AY18-19
Credo	397	693	257	592	496
Ebook Central	4798	9,522	7,484	8,755	9,884
EBSCO eBook Collection	474	621	308	528	222
Films On Demand	1454	5,004	9,238	19,159	13,115
total electronic circulation	7,467	16,192	17,543	29,531	24,848

In January 2018, the Library started using the same login system for off-campus access to our online collections that the college uses for mySiskiyous and Canvas. This appears to have simplified off-campus access for students since we no longer receive a steady stream of inquiries regarding specific difficulties or the process in general. While this does not appear to have an impact on ebooks use, it may be the explanation for the general spike in use of article databases between AY16-17 and AY17-18. The use spike of *Academic Search Complete* is the most prominent, with a 28% increase in use between AY16-17 and AY17-18 and another 22% increase between AY17-18 and AY18-19.

Top 6 EBSCO Article Database Use Statistics

Database	Result Clicks[7]		
	AY16-17	AY17-18	AY18-19
Academic Search Complete	16,945	21,732	26,567
CINAHL Plus with Full Text	4,369	3,672	5,279
MasterFILE Premier	4,472	4,247	2,792
Psychology and Behavioral Sciences Collection	2,964	2,590	2,688
America: History and Life with Full Text	1,562	945	928
MEDLINE	579	1,023	920
total	*30,891*	*34,209*	*39,174*

Clearly use of online materials vastly outstrips the use of physical materials.

Students taking our Annual Student Survey respond that our collections, both physical and electronic, are improving at meeting their needs, from 82% of respondents in 2014 to 92% in 2019 Strongly

[7] A "result click" = A click originating from a set of search results. Statistics for AY14-15 and AY15-16 are not available (they were not pulled and saved at the time and not retrospectively available).

Agreeing or Agreeing. The Library currently spends about half of its budget (excluding personnel costs) on materials for our collections. About 75 percent of collection costs are for online subscriptions and 25 percent for physical materials (25-30% of which is spent on reserve textbooks).[8] Online collections are cost effective and are readily available to all students 24/7, regardless of location. Physical titles are carefully selected to target student needs and current interests, help fill gaps in our ebook collections (it often takes 1-2 years for new titles to be included in our ebook collections), and fulfill student requests for specific titles. This balance appears to be effective and helps us to meet Accreditation Standard IIB1.

		2014	2015	2016	2017	2018	2019
Library collections are sufficient in quantity, currency, depth, and variety to support student research needs.	Strongly Agree	30%	39%	34%	37%	38%	50%
	Agree	52%	42%	51%	47%	52%	42%
	Neutral	8%	14%	6%	4%	5%	2%
	Disagree	4%		1%		2%	2%
	Strongly Disagree				2%		2%
	Don't Know or N/A	4%	6%	8%	5%	5%	3%

Last but not least, the Library is also home to the Mount Shasta Collection which is the largest known repository of information and documents about Mount Shasta. The collection consists of thousands of books, articles, manuscripts, photographs, maps, prints, and audiovisual materials about the Mount Shasta volcano and surrounding area. While not used often by students, the collection receives steady use by community members and other researchers. The Library frequently collaborates with the Sisson Museum in Mount Shasta and occasionally with the Siskiyou County Museum in Yreka by providing research assistance and display materials. In the last four years, the Library has hosted a variety of non-local researchers which have or will result in publications such as a creative writing dissertation, conference presentations, articles, books, and a TV episode. The Mount Shasta Collection has not grown significantly in recent years as staff numbers and budget shrink and further discussions on its value to the college and the appropriate level of human and funding resources to devote to it are needed.

Research Services

Our collections serve as the backbone for our reference services. For reporting purposes, a reference transaction is defined as:

> Information contacts that involve the knowledge, use, recommendations, interpretation, or instruction in the use of one or more information sources by a member of the library staff… Information sources include printed, online, and non-printed materials, e-resources and databases (including assistance with computer searching), the library's own catalogs and other holdings records, other libraries and institutions through communication or referral, and persons both inside and outside the library.[9]

[8] Figures used for these general calculations are from the Library's IPEDS data for AY14-15 through AY17-18

[9] *ACRL Academic Library Trends and Statistics: Annual Survey: Instructions and Definitions*. ACRL, Aug. 2019. https://acrl.countingopinions.com/docs/acrl/2019_Survey_Instructions.pdf

	AY10-11	AY11-12	AY12-13	AY13-14	AY14-15	AY15-16	AY16-17	AY17-18	AY18-19
reference transactions	1,050	640	561	493	574	493	393	467	277

Reference questions have been gradually declining in the Library. Some of the recent decline may be due to an increase in reference questions being handled in the classroom. Hands-on research sessions have become popular and are conducted with multiple classes each semester. The small increase in AY17-18 may have been due to the implementation of a revised and simpler reference statistics tracking system. Unfortunately, tracking manual daily statistics became more burdensome in AY18-19 with the implementation of TutorTrac, which requires staff to now manually enter community use of the Library. Community members do not have TutorTrac accounts but we do not want their usage to go uncounted. Library staff managed to record 668 community member visits to the Library in TutorTrac; no doubt there were many more that were uncounted. It is worth considering switching to reference statistics sampling weeks that can be extrapolated, a common library practice, in order to lighten staff load. It is also worth noting that in addition to reference transactions, library staff fields (and attempts to track) a variety of other questions as well such as campus directions, campus contact info, and computer, printing, copier, and scanner help.

Use of Our Physical Space

While use of the physical library space has declined since 2010, use in the last few years has started a slow climb from the low in AY16-17.

	AY10-11	AY11-12	AY12-13	AY13-14	AY14-15	AY15-16	AY16-17	AY17-18	AY18-19
gate count	51,784	40,279	32,957	26,334	20,944	23,277	16,127	17,877	19,778

Starting with the Fall 2017 semester, the Library has stayed open until 7:00 p.m. on Mondays and Wednesdays. These are our first evening hours in approximately eight years. While use has been light, students often express their appreciation for these evening hours. In general, most of the use is between 5:00 – 6:00. We had more favorable responses on our Spring 2018 Annual Student Survey to the question “The library provides adequate access to its services and collections. (Consider things like our hours, Internet access, and service to online and distance users)”: 91% of students stated that they “strongly agreed” or “agreed” (only 2% disagreed). This number is up from previous years: 78% in 2017, 77% in 2016, and 83% in 2015. 2018 was also the first time many years that we did not get written comments regarding evening hours (2019 had one comment from a Lodge student that even later hours “would be cool”). We do still get requests for weekend hours.

In addition to adding evening hours, the Library transformed the “loft” area into the Library Lounge, moving more armchairs into the space, allowing food and drink, and encouraging its use a gathering space. The Lounge has also started to serve as an event space for student club movie nights and Writers Club events. All of these changes may have helped to draw people into the Library.

The Library started to use TutorTrac in Fall of 2018. TutorTrac is a sign-in kiosk that asks students to log in using their student number and then select the class and reason that prompted their visit. Students also have some generic selections if they choose not to specify. Since the Library also welcomes community members, staff manually enters their data into TutorTrac in order to have their visits counted in our overall use totals. Community members are tracked using generic accounts so data cannot be individualized; staff does enter a specific reason for the visit whenever possible.

TutorTrac shows that there were 9,228 logins from July 1, 2018 – June 30, 2019, our first full year using this login system. Our gate count for the same time period was 19,778. Both of these statistics have their flaws:

- Gate counts tend to overcount the number of users (it simply counts the number of bodies walking through the entry gates and does not factor in people who may come and go during the course of their library visit to take phone calls, restroom breaks, etc.)
- TutorTrac is expected to undercount since not all students remember to log in and staff may not always notice a community member who comes in

TutorTrac does give us more info than we have had in the past about use of the Library and it has been helpful to analyze it and compare it to our Annual Student Survey data. The Library has asked a question on our Annual Student Survey since Spring 2016 about students' main use of the library, asking them to choose their "main use of the COS Library"; online databases, reserve textbooks, check out books, computers/printing, study space, or other.

The Annual Student Survey collects surveys in the Library and from around the Weed Campus (Lodges, Student Center), from Yreka Campus, and online, so not all survey respondents necessarily come into the Library. It is interesting to note that looking solely at responses gathered on the Weed Campus, students who had access to the Library's physical space ranked "quiet study space" second over "online databases," a rankings reversal from total responses. This seems reasonable since online and Yreka students may have limited opportunities to visit the Library in person.

	Average number of responses (2016-2019)	Rank		*Average # of responses (Weed only)*	*Rank (Weed only)*
Computers/printing	36	1		*31*	*1*
Online databases	33	2		*24*	*3*
Quiet study space	32	3		*30*	*2*
Check out books	17	4		*15*	*4 (tie)*
Reserve textbooks	16	5		*15*	*4 (tie)*
Other	6	6		*5*	*5*

TutorTrac asks similar questions, making comparisons between its results and the Annual Student Survey useful. Comparing AY18-19 TutorTrac responses to the results from surveys collected only in the Library in Spring 2019 clearly shows that students who do use the physical library space are doing so primarily because of access to computers, printing, and quiet study areas.

Our Annual Student Survey, which is collected from students both inside and outside of the Library, shows that that "online database" are a valued part of the Library. The fact that research/online databases is ranked much lower by in-person library visitors indicates that students are primarily doing research online from elsewhere and indicates that the Library should perhaps focus on expanding the online self-serve help that we provide students.

TutorTrac Reasons (and # of responses)	TutorTrac rank	Survey rank	In-library only rank	Survey Uses (total/2019 in-library only)
Books/Textbooks = 793	4	2 (tie)	3	Check out books + Reserve textbooks = 33 / 11
Computer Use + Printing = 3,473	1	1	1	Computers/printing = 36 / 17
Study = 3,353	2	3	2	Quiet study space = 32 / 16
Take a Break = 1,061	3	4	5	Other = 6 / 2
Research = 547	5	2 (tie)	4	Online databases = 33 / 9

It should be noted that the TutorTrac statistics used here also include community member use which account for 7% of logged sessions. About 61% of community members visit the Library to use our computers; 15% for newspapers, magazines, and books; 11% to use the wifi; 6% for other reasons ("take a break"); 5% to conduct research; and 3% to simply print.

TutorTrac data shows that most of the students who use our physical space are repeat users (76.4%), which suggests a certain level of library satisfaction. Over a fifth (21.2%) of our student visitors are "super users" who visited the Library twenty or more times between July 1, 2018 – June 30, 2019. The average number of visits for super users was 44, with users at the high end visiting over 100 times (our highest number of visits by one student was 173!). Interestingly, super users' primary use of the Library was overwhelmingly to study, with computer use coming well in second. Perhaps this 2016 Annual Student Survey comment is from a super user: "I do more homework the more time I spend in the library." Comments on the Annual Student Survey and in the Library's suggestion box often mention appreciation for the Library as a quiet study space.

	TutorTrac logins	% of total
unique # of students visiting the Library	664	
students who only visit once	157	23.6%
students who visit 2-4 times	175	26.4%
students who visit 5-9 times	87	13.1%
students who visit 10-19 times	92	13.9%
students who visit 20 or more times	141	21.2%

TutorTrac reasons	Visits by super users for reason	Rank
Study	2534	1
Computer Use	1333	2
Take a Break	880	3
Printing Services	674	4
Books/Textbooks	357	5
Research	353	6

Students have been increasingly happy with our physical space. Three of our Annual Student Survey questions are tied to our space and cover everything from equipment to access to comfort.

survey questions		2015	2016	2017	2018	2019
The library provides sufficient educational equipment to support student research and learning. (Consider things like computer workstations, printers, microfilm reader, photocopier & scanner)	Strongly Agree	56%	44%	60%	56%	67%
	Agree	31%	40%	29%	33%	30%
	Neutral	6%	10%	4%	5%	2%
	Disagree	6%	1%	2%	5%	
	Strongly Disagree			1%		2%
	Don't Know or N/A	3%	6%	2%	2%	
The library provides adequate access to its services and collections. (Consider things like our hours, Internet access, and services to online & distance learners)	Strongly Agree	50%	33%	44%	50%	64%
	Agree	33%	44%	34%	41%	31%
	Neutral	14%	15%	15%	6%	3%
	Disagree		6%	3%	2%	
	Strongly Disagree	3%	1%	3%		2%
	Don't Know or N/A		1%		2%	
The library provides a safe, clean and comfortable environment for students to study and do research.	Strongly Agree	8%	59%	72%	68%	80%
	Agree	19%	34%	18%	22%	16%
	Neutral	3%	3%	10%	5%	2%
	Disagree			1%	2%	2%
	Strongly Disagree			1%		2%
	Don't Know or N/A		4%		3%	

Some improvements we have made in the past four years, many based on student feedback, include:

- Increased access by adding evening hours from 5:00 – 7:00 p.m. on Mondays and Wednesdays, starting with Fall 2017
- Eliminating library cards and our making off-campus database login the same as mySiskiyous
- Working with IT to install a double-sided printer (a frequent student request)
- Purchasing a new digital microfilm reader machine
- Purchasing of some new furniture (including computer desk task chairs and armchairs)
- Moving the staff service desk to create a more welcoming space when students first enter the Library. This space is used for displays and as a “new book” area.

- Transforming the Library's "loft" area into the Library Lounge by reducing the collections stored there, relocating some additional armchairs, allowing food and drinks, and designating it a non-quiet area to encourage gatherings and conversation.
- Borrowing three ASC laptops set up with Proctorio for online student test proctoring

By comparing the ethnic breakdown of students using the physical library space (based on TutorTrac logins) to the ethnic breakdown of the campus as whole, it is obvious that the Library is not serving our Hispanic students very well and needs to work on reaching this group of students better. While still import to address, the gap is not quite as awful as the numbers suggest. The campus-wide statistic includes FIELD students who are overwhelmingly Hispanic but well outside of our geographic area (and, therefore, not in-person library users). The Library is doing a good job of reaching other student populations, including other minority groups. We do not have a similar data set to analyze for students who only experience the Library online.

	All Student Count	All Student Count (%)	Library User Count	Library User Count (%)
Siskiyous Total	5,360	100.00%	627	100%
African-American	119	2.22%	39	6.22%
American Indian/Alaskan Native	78	1.46%	26	4.15%
Asian	90	1.68%	14	2.23%
Filipino	30	0.56%	3	0.48%
Hispanic	2,566	47.87%	94	14.99%
Multi-Ethnicity	210	3.92%	70	11.16%
Pacific Islander	17	0.32%	6	0.96%
Unknown	226	4.22%	26	4.15%
White Non-Hispanic	2,024	37.76%	349	55.66%

Non-library survey data

The very general question about the Library on the Noel-Levitz Survey indicates that overall Library satisfaction has been increasing during the past few years, although satisfaction is not rising quite in step with importance. We will be watching these survey results to see if rankings and gaps continue to improve.

Noel-Levitz Survey responses to the statement: Library resources and services are adequate.

	COS Importance	COS Satisfaction	COS Gap[10]	US Importance	US Satisfaction	US Gap	US-COS Satisfaction Gap[11]	US-COS Gap Gap[12]
2016	5.49	5.36	.13	6.14	5.92	.22	-.56	.09
2017	5.97	5.22	.76	6.27	5.84	.43	-.62	-.33
2018	6.07	5.63	.44	6.2	5.99	.21	-.36	-.23

6. Evaluation

Analysis of what is working well and why (or not) has often been discussed elsewhere in this Comprehensive Program Review. The below list provides references to where a particular topic was discussed, including if follow-up action was included in our Four-Year Action Plan. If a topic was not discussed elsewhere, analysis has been included.

a) Representativeness of population served
- Discussed in *5. Other Unit-Specific Research*: "Use of our Physical Space"
- Follow-up action addressed in 9.c

b) Alternative modes and schedules of delivery
- Discussed in *1. Description of Program, 5. Other Unit-Specific Research*
- Follow-up action addressed in 9.b, 9.c, 9.e

c) Partnerships (internal and external)
- Discussed in *1. Description of Program*
- Follow-up action addressed in 9.c, 9.d, and 9.e

d) Innovation and implementation of best practices
- Library staff participates in continuing education (see i. below), consults with library colleagues, and reads discipline-specific literature in order to keep up with innovations and best practices in our area

e) Efficiencies in operations
- Discussed in *1. Description of Program*
- Follow-up action addressed in 9.a

f) Efficiency in resource use
a. Discussed in *1. Description of Program*
b. Follow-up action addressed in 9.e

[10] COS Gap "is the difference between how important our students found the item compared to how satisfied they were (positive numbers suggest less satisfaction than importance)"—as per Research & Evaluation, Aug. 2018
[11] US-COS Satisfaction Gap "is the difference between how satisfied students were in the whole national sample compared to COS (here, negative numbers mean less satisfaction than the average) —as per Research & Evaluation, Aug. 2018
[12] US-COS Gap Gap is the difference between the US Gap and the COS Gap

g) Staffing

- Discussed in *1. Description of Program*
- Follow-up action addressed in all aspects of *9. Four-Year Action Plan*

h) Participation in shared governance

All staff participate in Planning Day activities. Marcia and Linda feel there are adequate opportunities to participate in shared governance and campus decision-making but, thus far, have declined the opportunity to participate on campus committees. It is too soon to tell whether or not the newly-formed Classified Senate will provide them with an avenue for greater participation.

As Faculty Librarian, Jude participates in shared governance by attended Academic Senate meetings and serving on Equivalency Committee (Fall 2014 – Spring 2015), Accreditation Steering Committee, Chair of Standard IIB (August 2014 – March 2016), Program Review Committee (August 2015 – February 2017), Distance Learning Committee (September 2016 – current; suspended Fall 2019), Instruction Council (September 2016 – current; attend as Library representative, not as an Academic Senate representative), 508 Compliance/ADA Workgroup (November 2017 – current), Guided Pathways (in various iterations since Spring 2018; currently on Pillar 3), and several hiring committees.

Library staff works collaboratively on planning and decision-making. The Library used to have regularly scheduled staff meetings that included our administrator but we have moved away from this in the past few years since administrator attendance has been minimal. Library staff now meets on an as-needed basis. We would like to return to a light schedule of meetings with our administrator once or twice a semester to supplement our internal meetings.

i) Professional development and training

The Library has invested our budget in the following professional development opportunities and trainings since AY2014-15 [13]; the Library's budget has been sufficient in this area.

- **Jude**: Council of Chief Librarians (CCL) Annual Dean's Directors Meeting (2015, 2016, 2017, 2018, 2019); Copyright Workshop (American Library Association, 2016); Library Assessment & Statistics (CCL, 2016); CCL Regional Library Meeting (2017); Libraries and Guided Pathways (CCL, 2018); Spring Fling brief online workshops on marketing and data literacy (California Library Association, 2018); Library Marketing (Infopeople, 2018)
- **Marcia**: WMS West Coast Annual Meeting (2016), Caring for Collections (Library Juice, 2016), Authority Control (Library Juice, 2016), Library Design (CCL, 2017); Intro to Archives Administration & Management (Library Juice, 2018); Using MarcEdit (Library Juice, 2019)

[13] This list includes training paid for from the Library's budget only. It does not include Flex and other campus-provided activities, training paid for out of other campus funds, or training paid for with personal funds.

- **Linda**: Student Staff Development (Library Juice, 2016), Beginning Cataloging (Library Juice, 2017); Core Reference Fundamentals (Infopeople, 2018); Designing Effective New Employee Orientations (infopeople, 2018)
- **Nancy Shepard**: CCL Annual Dean's Directors Meeting (2015, 2016)

j) Compliance with applicable mandates

The Library completes the Chancellor's Office Library Annual Data Survey and IPEDS Library survey as required each year.

This Program Review provides many examples of how the Library is working to meet ACCJC Accreditation Standard IIB for providing student support "sufficient in quantity, currency, depth, and variety, and variety to support educational programs, regardless of location or means of delivery"; for making informed decisions regarding selection and maintenance of our resources; and assessing whether or not our resources, services, and collaborations are meeting student needs.

7. Vision

Four years from now…

a) The Library will have adequate staffing to meet our workload needs and provide adequate open hours
b) The Library will have increased instructional activities, including offering a credit-bearing Research Skills and/or Information Literacy course
c) The Library will have greater student engagement from developing a student-friendly space, by adapting to the ways students use technology, with increased activities, and through access to resources that meet student needs
d) The Library will have greater faculty engagement with both our space and our collections
e) The Library will have a management plan for our unique Mount Shasta Collection and for the College History Archives

8. Progress on Prior Goals

Here are the updates on goals and projects covered in our last Annual Update in Fall 2018.

Updating Library space to be more appealing to students

- Worked with IT to assemble and purchase needed equipment to show movies in the Lounge; purchased media cart and sound system for the Lounge
- Worked with Maintenance to hang a retractable screen in the Lounge and add window frame hooks for removable blackout curtains for movie events
- Selected new furniture and sound panel purchases for FY18-19 but funding was frozen before purchases could be made; ideas have been saved for FY19-20
- The Library did not conduct a focus group in Spring 2019 as planned

Staffing challenges

- The Library has not made progress in resolving staffing limitations; efforts such as reclassifying one position to a higher pay rate, obtaining overtime funds to cover evening hours as needed, and requests for adjunct funds to offer more hours during Winter/Summer sessions have been unsuccessful. Keeping up with the demands of the LSP migration project have been challenging and the Library is behind schedule

Banner-EZProxy integration

- After discussion with IT, this issue was tabled until after the migration to the new LSP is complete

The Sheet Music Project

- This project was suspended when we took on the migration project; we will return to it in AY19-20

9. Four-Year Action Plan

The Library has developed a Four-Year Action Plan based on our Vision.

a) The Library will have adequate staffing to meet our workload needs and provide adequate open hours

The Library has been operating with a skeleton crew since the retirement of Nancy Shepard and is now facing the retirement in Spring 2020 of our longest-serving staff member, Marcia Eblen. Nancy's departure left an administrative gap that is being partially filled by the faculty librarian, decreasing the time available for instructional activities. In addition to providing much institutional history for both the Library and the college as a whole, Marcia also handles high-level work using a skill set that will be difficult to replace. Attempts in 2018 to reclassify her position at a higher level were unsuccessful even though some of her workload requires specialized training and some leans towards faculty work such as in-depth reference assistance with the Mount Shasta Collection and original cataloging. The Library has also faced limitations on open hours during the Summer Session and Winter Intersession because the faculty librarian only has a 195-day contract and adjunct funds are limited.

The Library needs a third person in order to maintain existing hours and to have reasonable open hours during Summer/Winter, however, the Library needs to examine workload and determine how to best fill Marcia's position. Some ideas include: filling the position "as is"; filling it as a 10-month position and putting the Faculty Librarian on a 244-day contract with the salary savings; or filling it as a 10-month position and adding an Adjunct Librarian with the salary savings.

In the last couple of years, library staff has become burdened by statistics-keeping at the service desk. Staff track reference statistics, tour headcounts, gate counts, community member TutorTrac logins, and special statistics (like periodical use) in addition to providing reference assistance and other help to students. The result is that staff cannot keep up and statistics quality suffers. Compiling this program review has also brought to light some areas where statistics could be better aligned, such as TutorTrac "reasons" and our Annual Student Survey "library use reasons" question.

Action Steps:

- Determine positions the Library needs by the end of February 2020
- Write job descriptions and submit CQIP(s) as needed
- Fill position(s) by June 30, 2020 (Marcia retires at the end of Spring 2020)
- Investigate extrapolated statistics-keeping by the end of Spring 2020; implement by Fall 2020
- Realign survey/statistics questions as needed between Annual Student Survey, TutorTrac, Library SLOs, CCCCO Annual Data Survey, IPEDS, ACCJC Accreditation standard IIB, Noel-Levitz, CSSE, etc. by Fall 2020
- Schedule twice-a-semester meetings with the Library's administrator to aid communication

b) The Library will have increased instructional activities for students, including offering a credit-bearing Research Skills and/or Information Literacy course

Database use statistics are very high while students claiming to come to the Library for research purposes is low (as are reference statistics), indicating that students are doing their research online and on their own. While the Library has contact with a large number of students through class visits, tours, and other activities, many students still never receive direct instruction or interact with staff. Research skills are important for student success in many classes and have the potential to be a marketable job skill. Library staffing is often an obstacle for expanding instructional activities.

Action Steps:

- Update existing instructional materials. Materials related to the library catalog need to updated and replaced in Spring 2020. Develop a project list of other needed or anticipated updates by the end of Spring 2020 with target dates for completion.
- Submit curriculum for at least one credit-bearing class by January 31, 2021
- Student employee supervisor will complete local Canvas training by June 30, 2020
- Expand student employee training program in Canvas to include a Customer Service badge by December 31, 2020
- Investigate whether or not the Library can access individual use statistics for our online collections with the new LSP, the switch to single sign-on, or using the new EZproxy Analytics product (this data is not currently available to us). Learning more about student use of online materials may shine a light on other areas where we can improve
- Revise the Library's SLOs
- Look for ways this general goal might support Guided Pathways efforts on campus

c) The Library will have greater student engagement from developing a student-friendly space, from adapting to the ways students use technology, from increased activities, and through access to resources that meets student needs

With over 20% of our users visiting the Library an average of 44 times, many students clearly love our space! These library "super users" as well as Annual Student Survey feedback consistently indicate that they appreciate the Library as a quiet study space. The Library would benefit from learning about what "regular" students would like from our space and balance this with what is already working for many

students. More marketing of our space and resources, both in their current form and as they evolve, is also important.

Action Steps

General

- Conduct a student focus group about ways the library can better engage with and support students, including Library hours during all semesters
- Refresh marketing materials promoting the Library space, collections, and resources
- Look for ways this general goal might tie into Institutional Master Plan Focus Area 3 (Engagement) and might support Guided Pathways efforts on campus
- Research academic library student engagement to generate new ideas
- Maintain AY2018-19 gate count in AY2019-20. Increase gate count and the number of unique student visitors (TutorTrac) by 3% in each subsequent academic year. Work with the ASC to re-allow EDUC 0670 students to study in the Library[14]

Academic Year	AY18-19	AY19-20	AY20-21	AY21-22	AY22-23
Target gate count #	16,126	16,126	16,610	17,108	17,621
Target # of unique student visitors	9,228	9,505	9,790	10,084	10,387

Develop a student-friendly space

- Continue to replace old, uncomfortable furniture with new furniture
- Give our aging space a boost with fresh paint in certain areas such as the window bays, window sills, railings and the study room
- Develop LRC 9 into a multipurpose technology room that can be used as an overflow study/testing room (and can still be combined with LRC 8 for large groups)
- Determine ways the library can be zoned to have both quiet study areas as well as areas that do away with the "hushed" stereotype in order to meet a variety of student study preferences; consider enclosed study cubbies or small study rooms (for solo quiet), and/or a glass barrier wall for the Lounge
- Investigate how to better reach Hispanic students on campus in order to increase their use of our space

Adapting to the ways student use technology

- Investigate student preferences and implement a way to contact the Library by text, chat, or other methods

[14] In the past, students enrolled in "athletic study hall" have had the option of spending that time period in the Library. With the revamped, more academic EDUC 0670 that launched in Fall 2019, students no longer have this option. The Library is working with the ASC to determine if this can be allowed again while still being in compliance with Chancellor's Office requirements for EDUC 0670.

- Aquire more laptops; when desktop computers are due for replacement, consider replacing some with laptops (current library computers were installed in 2014)
- Aquire Chromebooks specifically for Proctorio testing
- Aquire portable chargers for phones and other devices. Possibly include ones for laptops too since there is a shortage of electrical outlets
- Investigate student preferences about a computer workstation that can be both wheelchair accessible and serve as a standing workstation

Increased activities

- Increase the amount of Student Club use of the library
- Start offering Library-sponsored activities such as speakers, movie nights, craft/maker activities, game nights, local history exhibits, and student art shows
- Reassess current technology used for movie nights (some of the technology is old and has been problematic)
- Consider offering "special occasion" hours such as during Thanksgiving and Spring Breaks and the Sunday before finals
- Participate in the Student Success Seminars again (if the ASC offers this workshop series); considering holding classes in the Library study room
- Increase awareness of library services on the Yreka Campus

d) Increase faculty engagement with the library

The Library would like to strengthen our partnership with all discipline faculty to better support our curriculum and students. The Library often reaches out to faculty with email updates, information in newsletters such as *Campus Connection* and Dean Peretti's *LASt Word*, and with direct appeals (visiting a faculty member in person, presentations at Academic Senate or other meetings, etc.). Faculty feedback is taken seriously and the Library has often implemented their suggestions such as reserves on Yreka Campus, starting a *JSTOR* database subscription, and bringing back interlibrary loan services (ILL) in 2014. Unfortunately, these efforts alone do not seem to be working well: faculty rarely come to the Library and their use of our physical collections and services like ILL are low. The extent of their use of our helpful Services to Faculty site, our online collections and our instructional materials such as video tutorials and Canvas modules is unknown. Library staffing may be an obstacle to completing some of these activities.

Action Steps

- Investigate the possibility of transforming LRC 9 into a multipurpose technology room that can be used as a media production space for faculty (among other uses)
- Create additional instructional materials to be posted online and in Canvas. Develop a project list by the end of Spring 2020 with target dates for completion.
- Create an online flex activity for faculty that teaches them about library collections and services by the start of January 1, 2021
- Offer updates and presentations on our new LSP "discovery system" in Spring 2020

- Participate in any training offered for adjunct faculty, either online or in person
- Determine faculty library needs through a general survey, focus group, or reintroduction of an Advisory Committee
- Market the Library space to faculty such as for meetings and adjunct work space
- Look for ways to collaborate with faculty on specific projects that will benefit their area (as Library time/staffing allow). Finish the current project with the Music faculty
- Investigate ways we can collect better use statistics of online collections and resources by faculty
- Start regular meetings with the ASC Coordinator and Basecamp Coordinator to better support each area's efforts and increase communication within the LRC areas directly serving students
- Look for ways this general goal might support Guided Pathways efforts on campus

e) Improve our collections

Much of the Library's work revolves around our collections, from cataloging and book checkouts to web site content to reference and instruction. While student satisfaction with our collections has been going up, there is still room for improvement. The more use our collections get, the better the value for the college. The Library also maintains several collections more for the benefit of the college than for students: the Mount Shasta Collection and the college "archives" which preserves materials important to college history. Library staffing may be an obstacle to completing some of these activities.

Action Steps

- Include collection development policies in AP4040 and have AP4040 approved by the Board by June 2020
- Create a collection development plan for the college "archives"
- Create a collection plan for the Mount Shasta Collection that takes into account staffing and budget considerations
- Grow collaboration with Siskiyou Count County Libraries to leverage our collections
- Research the need for and determine if funding is available for a science database
- Increase book circulation
- Look for new ways to track/analyze print circulation: is purchasing print worth the budget?
- Increase use of Yreka Reserves
- Look for ways this general goal might support Guided Pathways efforts on campus

10. Conclusion

The COS Library is doing well. We are fulfilling our mission to support student learning and our college employees in a variety of ways. In doing so, we also support the mission of the college and are meeting accreditation requirements. While we are doing well, the Library has identified areas where we can improve, adapt to changing times and technology, and continue to grow stronger so that we can continue to meet our campus community's needs in the first half of the 2020's.
