College of the Siskiyous Instructional Program Review 2019-2020
Submitted: 12/15/2020

- Child Development and Early Education (ECE)
- Patrice Thatcher-Stephens, Program Coordinator Child Development and Early Education, ECE

I. Description of Program:

(*Formatting note… from the perspective of 2019-2020 oddities, I am taking liberties as I compose this document, and highlighting -in this blue text- sections that speak to "Long Range Planning Goals and Previous Program Goals" within the body of review.)*

a) Organization Staffing and Structure:

The ECE—Child Development and Early Education Program is organized as a Career and Technical Education Program under the purview of the Dean of CTE as follows

- President/Superintendent of College of the Siskiyous
- Vice President of Instruction
- Dean CTE
- ECE Program Coordinator and Full Time Tenured Instructor
- Experienced and fully qualified Adjuncts hired on semester by semester basis

b) Primary Purpose:

The ECE Program at College of the Siskiyous serves two primary and equally important purposes. We prepare front-line early educators for work throughout the geographical and expanded online area served by the college. Equally important prepare students for transfer to 4-year institutions through our ADT degrees.

The ECE-Child Development and Early Education Program- at College has been part of the Career and Technical Education Area at College of the Siskiyous since the mid 1960's. The program has grown to offer curriculum aligned with 111 other California Community Colleges throughout California and to offer transfer degrees to all CSU's with CD or ECE programs and numerous out-of-state or independent four-year colleges.

For over a decade we have offered videoconferenced/Zoom, face to face and online instruction to meet the diverse and expanding need for qualified early educators throughout our geographic area. We have historically served online students throughout California. In response to the February 2020 COVID19 Emergency, ECE was, literally, the first COS Program to proactively respond. We immediately connected with our statewide CCCECE-California Community College Early Childhood Educators https://cccece.net/ —network to collaborate with statewide cohorts to move our programs online and onto Zoom. We finished the Spring 2020 semester, planned for Summer and Fall 2020, and set the foundation for our Spring 2021 classes, including Zoom/internet-based Practicum. We readied our program for all-online instruction until the pandemic limitations are resolved.

- Graduates of our program find, or advance in their existing, employment at Head Start, California State Preschools and in Independent Early Education Programs.
- Following the Two-Year Course Rotation, students can complete a local A.A. Degree, a Transfer Degree to any California State University or articulate, as a junior, to Southern Oregon University's online Early Childhood Development Program.
- Our Rotation of Courses offers classes leading to all levels of California State Child Development Permits issues through the California State Department Commission on Teacher Credentialing.
- Our Rotation of Courses offers classes leading to all levels early educator qualifications included in Title 22 Division 12 from the California State Department of Social Services Community Care Licensing, Teacher Qualifications.

College of the Siskiyous Instructional Program Review 2019-2020
Submitted: 12/15/2020

- Child Development and Early Education (ECE)
- Patrice Thatcher-Stephens, Program Coordinator Child Development and Early Education, ECE

- As online degrees have become more accessible, COS, students are currently pursuing the Bachelor's Degrees at National University, Ashford University, Simpson College and Pacific Oaks.
- Many students choose to complete their B.A. degrees in elementary or primary education
- Students often work in early education programs while completing classes for their A.S. degree, Permits, or transfer requirements.
- Our practicum site at Discovery Child Development Center--a collaboration with Shasta Head Start--is the only program in Siskiyou County Accredited by the National Association for the Education of Young Children. Through our work with the California Early Childhood Mentor Teacher Program, we offer additional practicum sites throughout Siskiyou County.

c) Whom you serve (including demographics)

Geographic Service Area

Siskiyou County, adjacent to Oregon in the northern, inland region of California, is the fifth largest county in the state. More than sixty percent of Siskiyou County's land is managed by federal and state government agencies. These include the USDA Forest Service, the Bureau of Land Management, the U.S. Fish and Wildlife Service, and the California Department of Fish and Game. The county's 6,347 square miles encompass a wide variety of geographic areas and community structures.

The ECE Program at College of the Siskiyous has, historically, served students, throughout this area through videoconference capabilities and online classes. Based on research indicating that online instruction is not Best Practice in training hands-on early educators, we have resisted offering Core Classes online in spite of increasing success rates, excellent online instructors, and cohorts of technically sophisticated students throughout California consistently requesting that they be able to complete the degree online. In light of the COVID19 Emergency, an inspiring ability of our instructors—and CCC ECE faculty throughout the state-- to accommodate to unforeseen circumstances, CCCCO recognition of the imperative that ECE Programs continue to educate essential workers, and enormous support from the COS CTE area through both moral support and Perkins funding we have, now, in effect created an online ECE Program. See Long Range Planning Goals.

Siskiyou County is one of the most sparsely populated counties in California. Our students are spread throughout an area averaging approximately seven persons per square mile. Our students are often geographically isolated and served through videoconference sites throughout the county as well as at the main Campus in Weed and our site in Yreka. Our ECE students are both service providers and clients of family support services. The primary employers of College of the Siskiyous Early Childhood Education students are the California State Preschool, as administered through various entities, Head Start and Early Head Start, as administered through four different entities and a few local independent early education programs. We also serve family childcare providers. Through our Zoom/online classes we can continue to reach far distant sites in Siskiyou County. Offering classes through both technologies may, in fact, fill in access gaps previously impeding our ability to reach these sites.

Actual Students Served

Our students range in age and demographics from AP high school students or recent high school graduates, living at home or in the on-campus dorms, to experienced early educators near retirement age who are challenged to meet the increasing education requirements in our field.

College of the Siskiyous Instructional Program Review 2019-2020
Submitted: 12/15/2020

- Child Development and Early Education (ECE)
- Patrice Thatcher-Stephens, Program Coordinator Child Development and Early Education, ECE

Our students are primarily female, although we are making gradual, but steady, progress enrolling Perkins Defined Special Populations. A number of males in our ECE and General Education Classes. In spring 2019 we will have our first male graduate in recent memory. We collaborate effectively with Disabled Student Services to serve eligible students with a wide variety of special needs ranging from cerebral palsy to dyslexia.

Ethnicity

Based on data from the Annie E. Casey Foundation "Kids County Data Center" and most recent census data, the total population of Siskiyou County is approximately 45,000. The child population is approximately 10,000. The overall ethnicity of Siskiyou County is 87% European Descent, 10% Hispanic, 3% Native American, 1.3% Asian American, 1.2% African American, 6.1% Mixed, 1.2% 'other' (Yes, this adds up to over 100%--just referring to data…). Based on 2016 data, distribution of children, 0-5, of European Descent in Siskiyou County is 65%, the percentage of the 0-5 population that is Hispanic is 20%, Native American is 10%, African American is 1.5%, Asian or Pacific Islander 1% and "Other" 8% (again over 100%).

The significant 'take-away' from official, albeit 'sketchy' (that adding up to over 100% thing…) public data is that, in every case, the percentage of the general non-European child population of Siskiyou County exceeds the adult percentages. Per the PIVOT Data from our college research office, our program appears to reflect these trends, although college students have not been encouraged to accurately respond to demographic questions. This alignment is undoubtedly is coincident with the determination of early education programs to recruit and employ educators who accurately represent the ethnic make-up of the families they serve as well as the relative youth of COS students in general.

Socioeconomic Status and Generational Poverty

Lack of higher education opportunity is endemic in rural America and affects both the employment opportunities and life experiences of our students. This is compounded by regional transportation challenges and the challenges of our climate zone. The College of the Siskiyous is a lifeline to county residents. The ECE Program's Video Conferencing, and to a lesser extend online, capability is essential to both the well-being of the current generation of students and the future of the county. While some students struggle to enroll in, complete classes, and pursue additional classes required for Child Development Permits and graduation; a substantial number complete local degrees, transfer degrees, and obtain permits. Program data, verified by Child Development Training Consortium Student Profiles submitted to state and federal funding agencies each semester, documents from 10 to 20 students consistently enrolled in classes leading to Child Development Permits. The CDTC numbers reflect only students employed in early education programs while COS.

d and e) Program Services and Methods of Delivery

- We do not provide any Noncredit Courses.
    - Non-credit classes do not meet the academic, permit and transfer needs, of our students.
- We do not provide Basic Skills Courses.
    - Basic Skills classes do not meet the academic, permit and transfer needs, of our students.
    - We *do* value COS's Basic Skills preparation and these courses support out students' success. Through the CDTC subsidy program (see below) we award a cash stipend to qualifying students for Basic Skills units.
- Degree Applicable, Transfer Level and AD-T Classes Face-to-Face/Videoconferenced/Online
    - Local A.A. Degrees
    - AD-T Degrees
    - Child Development Permits at all levels
        - MOI: Currently our classes are provided Online/Zoom
        - Delivered through the Instruction Office and
- Supplemental academic support relating to Counseling/Advising
        - Delivered through consistent and collaborative work with COS academic advisors and counselors. During the COVID 19 Emergency our Counseling and Advising Services have been exceptionally committed to serving student needs.
        - Through our consistent Two-Year Course Rotation and our ECE @COS Program Guide we offer students a clear road map to meeting their educational and professional goals.
- We provide exemplary support for students with Special Needs and Disabilities.
        - Delivered through collaboration with COS' DSPS program.
        - Our new Director of DSPS has continued the consistent and appropriate support and accommodations required for our special-needs students. During the COVID 19 Emergency DSPS has been available to instructors and students as needed.
- Program Coordinator works with ECE Curriculum Alignment Project Work group and monitors CAP alignment at College of the Siskiyous. This initiative led directly to our early approval as an ECE AD-T degree through the CCCCO.
        - Delivered through statewide collaboration with early education partners.
- Student-Centered enrollment tracking and class scheduling.
        - Delivered through consistent monitoring and student survey.

College of the Siskiyous Instructional Program Review 2019-2020
Submitted: 12/15/2020

- Child Development and Early Education (ECE)
- Patrice Thatcher-Stephens, Program Coordinator Child Development and Early Education, ECE

- Siskiyous/ Shasta Head Start collaboration that allows College of the Siskiyous to have an onsite Practicum site at Discovery Child Development Center.
    - Delivered through the establishment of an ongoing COS MOU with Shasta Head Start
- Program Coordinator serves on California early Childhood Mentor Teacher team, working to provide practicum sites throughout the county.
    - Delivered through site evaluations and Mentor/Director Program assessment.
- Program Director offers support and referral to students in Child Development Permit Application, degree completion, transfer information and referral to support as needed through
    - ✓ Assessment of CHILD Development Permit applications.
    - ✓ Collaboration with community partners in accessing support available through
        - CDE Child Development Division
        - QRIS- Quality Rating Improvement System
        - First Five Siskiyou
- Program Director represents College of the Siskiyous on the Siskiyou (formerly Siskiyou-Shasta) Quality Rating Improvement System team.
    - Delivered through collaboration with local partners to implement the QRIS finding through which our county receives state and federal quality improvement funding for early education programs.
- Schedule and organize twice-yearly ECE Advisory Committee Meetings.
- The Program Coordinator prepares and submits College of the Siskiyous ECE Program Annual Report to Siskiyou early education network partners.
- In response to the COVID19 Emergency we put in place CCCCO approved accommodations to our clinical/Practicum and observation classes to meet the immediate needs of our students, preventing delay in Spring 2020 graduation or degree completion .
- In response to the COVID19 Emergency we built upon our emergency accommodations and with technical assistance from College of the Siskiyou IT department, a grant from CTE/Carl Perkins funding, and the California Early Childhood Mentor Teacher Program mentors, we have prepared and are implementing a Distant Learning Practicum class focused on Best Practice in early education in collaboration with lab school and local early education programs.

f) Curriculum is up-to-date and needs based.

Historic Context
The ECE Program has become more demanding over the past decade. Historic Success Rates were higher in ECE classes throughout the CCC system prior to the full implementation of the Curriculum Alignment Project after 2009. As the field required a more complete academic preparation, and California Community College

College of the Siskiyous Instructional Program Review 2019-2020

- Child Development and Early Education (ECE)
- Patrice Thatcher-Stephens, Program Coordinator Child Development and Early Education, ECE

ECE programs committed to this higher standard, our COS courses went through a complete curriculum review leading to both CAP alignment and our first wave AD-T degree.

At the same time, the ECE Program at COS became early adopters of online LMS's, first ETUDES and now Canvas. As in online education in general, we found that online students represented a different demographic than Face-to-Face/Videoconference students.

We, oddly, took a little pride in the C+ or B-, slightly above 'average', success rates that our students achieved as we first implemented this more rigorous curriculum and as we assumed the challenges of online instruction. However, ever committed to continuous improvement, we also understood that, along with the more challenging curriculum and new delivery method, we needed to offer new and better student preparation, monitoring and support. The 2019-2020 FTES/Retention/Success Rates are anomalous and understandable.

The COVID 19 Emergency triggered changes in both Modes of Instruction and Emergency Withdrawal protocol. FTES decrease significantly as students who were adversely affected by the pandemic left classes. The students who remained were able to persevere. In hindsight it was hard to lose students; however, enrollment for fall 2020 seems to have rebounded, and, while students (and faculty) still struggle with these life changing times, we seem to be persevering through this second full semester and finding equilibrium. In Spring 2020 we maintained our 2019 graduation numbers and FTES in Fall 2020 increased from 17.08 in 2019 to 18.5 in 2020.

PIVOT STUDENT SUCCESS RATE and FTES

Year	Total FTES	Retention	Success	ECE Graduates
2017-18	44.2	89-94%	78-88%	12
2018-19	47.6	86-100%	71-93%	15
2019-20	39.92	88---93%	78-90%	15

II. Indicators of Curriculum and Structure Updated Based on Student Need and Assessment Data include:

- Curriculum
  - The 24- unit ECE degree continues to ease transition through the program.
    - This decrease in units increased our number of graduates with both local A.A. degrees and ADT-T degrees.
    - Our graduation numbers continue to increase.
    - Enrollment in nondegree "Capstone" classes required for advanced Child Development Permits remains steady.
- Ongoing and Integrated SLO Assessment has allowed us to monitor and assess our program ability to offer students class assessments and experiences reflecting course AD-T aligned SLO's.

College of the Siskiyous Instructional Program Review 2019-2020
Submitted: 12/15/2020

- Child Development and Early Education (ECE)
- Patrice Thatcher-Stephens, Program Coordinator Child Development and Early Education, ECE

- Each year, for each class, a designated SLO is assessed aligning class assessments and experiences with the designated SLO.
- Ongoing and Integrated SLO Assessment has allowed us to monitor and assess our program ability to offer students class assessments and experiences reflecting course AD-T aligned SLO's.
- Each year, for each class, a designated SLO is assessed aligning class assessments and experiences with the designated SLO.
- Monitor the integration of classes that share similar SLO's. As part of this process we:
    - Design MOA's that accurately assess student understanding at all levels of Bloom's Taxonomy.
    - Scaffold and/or redirect students who might have failed in the past by carefully monitoring individual student status at census.
        - ✓ More accurate retention and success rates for ECE classes reflects this ability, but we are still working on both scaffolding students who are struggling and moving students to more developmentally appropriate classes before the first census date to avoid the appearance and reality of late withdrawal and failure.
- We have used ongoing and systematic SLO and PLO assessment to
    - Align with statewide "CAP" and AD-T standards for ECE programs.
    - Maintain and Align classes within our COS curriculum to reflect a common philosophy.
    - Align classes within our COS curriculum to build upon a common knowledge base.
    - Focus our work with students on both career goals (employment after completion) and transfer goals (articulation and transfer rates).
- We are committed to aligning our Course SLO's with Program SLO's.
    - This initiative has, unfortunately, been on the back burner as we fight more immediate fires. Sorry for the mixed metaphors.

g) Provide a breakdown of the classes offered in your areas within the Program Review cycle.

The Program Review Cycle at College of the Siskiyous has become significantly better monitored and aligned over the past two years. As always, ECE, as a Career and Technical Education programs has completed a program review every two years. The required format has become more consistent as we use an Annual Update reflect on the progress toward two-year goals; review our SLO assessment rotation and MOI's.

It is a joy to have a competent and engaged person responsible for providing the needed data for these reviews.

ECE Classes by Semester Classes required for degrees are in BLUE

Fall Classes

ECE 1001 Introduction to ECE Principles, Practices and Standards: This is the introductory class. It is a CORE class required for the A.S./A.S.-T/Permits/Title 22 requirements. It is offered every fall face-to-face and videoconferenced. Very seldom it is offered in the summer, online.

ECE 1002 Child Development: This is a CORE class required for the A.S./A.S.-T/Permits/Title 22 requirements. This class also satisfies the G.E. Social Sciences requirement. It is offered every fall face-to-face and videoconferenced. It is also often offered online, typically in the spring.

ECE 1003 Child, Family and Community: This is a CORE class required for the A.S./A.S.-T/Child Development Permits/Title 22 requirements. This class also satisfies the G.E. Social Sciences requirement. It is offered every fall face-to-face and videoconferenced. It is not offered online.

ECE 2000 Observing and Assessing--Desired Results and Developmentally Appropriate Environments:

This class is required for the A.S./A.S.-T/Advanced Permits. It is an advanced class—students should complete, or be enrolled in, the majority of their CORE classes before enrolling in this class. It is offered every fall face-to-face and videoconferenced. It is not offered online.

ECE 2002 Child Nutrition Health and Safety: This class is required for the A.S./A.S.-T/Advanced Permits. It is an advanced class—students should complete, or be enrolled in, the majority of their CORE classes before enrolling in this class. It is offered every fall face-to-face and videoconferenced. It is not offered online.

ECE 1999 Human Development: This class is NOT required for the A.S./A.S.-T/Child Development Permits. However, it does satisfy a CORE class requirement (can replace ECE 1002) for the Child Development Permit. This class also satisfies the G.E. Social Sciences requirement. It is offered most falls online and every spring face-to-face and videoconferenced.

ECE 2003 Serving Children and Families with Special Needs: This class is NOT required for the A.S./A.S.-T/satisfies Master Teacher Permit specialization. It is offered in the fall online.

ECE 2527 Supervision of Adult Staff in Early Education: This class is NOT required for the A.S./A.S.-T/required for Site Supervisor or Program Director Permits/required for Mentor Teachers. It is offered in the fall online.

ECE 0958 ECE Lab: This is a one or two unit lab-only class. This class is NOT required for the A.A./A.S.-T/required as one extra lab unit for Southern Oregon University Articulation. It is offered most semesters.

Spring Classes

ECE 1500 Introduction to Curriculum: This is a CORE class required for the A.S./A.S.-T/Child Development Permits/Title 22 requirements. It is offered every fall face-to-face and videoconferenced. It is sometimes offered online, but is not regularly scheduled as online.

ECE 1501 Positive Child Guidance: This class is NOT required for the A.S./A.S.-T/ applies to Master Teacher Permit Specializations. It is offered in the spring online. 12

ECE 1502 Serving Children and Families in a Diverse Society: This is a class required for the A.S./A.S.-T/ applies to Master Teacher Permit Specializations. This class also satisfies the G.E. Diversity requirement. It is offered every fall face-to-face and videoconferenced. It is sometimes offered online, but is not regularly scheduled as online.

ECE 1999 Human Development: See Above

ECE 2500 Family Relationships and Parenting: This class is NOT required for the A.S./A.S.-T/ applies to Master Teacher Permit Specializations. However, it does satisfy a CORE class requirement (can replace ECE 1003) for the Child Development Permit. This class also satisfies the G.E. Diversity requirement. It is offered in the spring online.

ECE 2501 Administration: This class is NOT required for the A.S./A.S.-T/ required for Site Supervisor or Program Director Permits/required for Mentor Teachers. It is offered in the spring online.

ECE 2502 Practicum: This is a class required for the A.S./A.S.-T/ Child Development Permits. This is a lecture/Lab class requiring 6 per week hours of work in an approved early education program. The California State Department of Education and Community Care Licensing Department of Social Services requires that students satisfy immunization requirements. See most current Update on following pages.

College of the Siskiyous Instructional Program Review 2019-2020
Submitted: 12/15/2020

- Child Development and Early Education (ECE)
- Patrice Thatcher-Stephens, Program Coordinator Child Development and Early Education, ECE

ECE 2510 Creative Art Activities: This class is NOT required for the A.S./A.S.-T/ applies to Master Teacher Permit Specializations. It is offered in the spring online.

ECE 0958 ECE Lab: See Above

III. External Factors with Significant Impact: What external factors have a significant impact on your program?

a) There's been an Apocalypse.

- Our ECE faculty has been personally grateful that the college supported and accommodated our movement to online instruction. We're doing okay. ECE was in the fortunate position of having created a 'market'/ 'need'/ 'desire' for online instruction.

We have been resilient in adjusting to online and Zoom instruction. The long videoconferencing history of the ECE Program was helpful and making that transition. The consistent support of the Dean CTE, Office of Instruction and Distant Learning Coordinator, ad well as out extended early education CCCECE network has sustained us.

- Budgetary Opportunities

The Child Development and Early Education, ECE, Program is an important program with both local and statewide recognition and value. We are a relatively inexpensive program. Over the years we had become disheartened by a laisse fair attitude toward our faulty and students.

That has changed, and we are very grateful and feel acknowledged and appreciated by the current Dean CTE, Perkins Coordinator, VP Academic Affairs and the COS Guided Pathways Committee.

  - We received significant financial support for our DCDC Playground Renovation.
  - We have been supported in our Practicum Planning initiative in response to the COVID 19 Emergency.
  - We received a Guided Pathways grant to complete Curriculum Mapping and CAP (Curriculum Alignment) work. This 2018 funding has been delayed by unsuccessful contract negotiation.

b) Competition from other institutions

We prefer to collaborate rather than compete. The majority of ECE programs and degrees at CCC's throughout California are aligned. Many have classes available online. Of course, we welcome transfer students from other CCC's. We offer our own aligned classes online and meet students enrolled at our cohort colleges online. When helpful and appropriate we refer our students, who need classes. out.

On the other hand, the promulgation of for-profit online institutions, while not specifically affecting our core program, increasingly affects the quality of the course of study available to educators, and early educators. Online education is great. Accessibility is important. The methods and tools of teaching in early education and primary cannot be adequately absorbed online.

- Child Development and Early Education (ECE)
- Patrice Thatcher-Stephens, Program Coordinator Child Development and Early Education, ECE

c) Requirements of four-year institutions

Because our program is aligned through CAP and is an AD-T program with an articulation agreement with Southern Oregon University, we benefit for the oversight and rigorous academic requirements included in those agreements.

d) Institutional regulation, policies, standards, and other mandates

The Child Development and Early Education Program at College of the Siskiyous prepares student for Title 5 Child Development Permits issued through the California State Department of Education Commission on Teacher Credentialing. Beyond the course work required for our local A.A. and AD-T degrees, we offer classes fulfilling the CTC requirements. Our program offers classes meeting the Title 22 Department of Social Services Community Care Licensing requirements for teachers employed in independent early education programs.

In addition to offering these classes, we direct students to appropriate 'permit' classes, scaffold permit application and refer students to sources of funding as appropriate.

Child Development Permit Matrix –College of the Siskiyous Classes Meeting Education Requirements for Matrix Option 1	
Assistant Teacher	6 units of any ECE COS classes (2 3-unit classes)
Associate Teacher	Required: 1002 Child Development OR 1999 Human Development/1003 Child, Family and Community OR 2500 Family Relationships and Parenting/1500 Introduction to Curriculum Plus: One more 3-unit class
Teacher	Required: 1002 Child Development OR 1999 Human Development/1003 Child, Family and Community OR 2500 Family Relationships and Parenting/1500 Introduction to Curriculum Plus: Five more 3-unit classes Plus: 16 units of degree applicable General Education Units (in any of the following: English/Math OR Science/Social Sciences/Humanities OR Fine Arts)
Master Teacher	Required: 1002 Child Development OR 1999 Human Development/1003 Child, Family and Community OR 2500 Family Relationships and Parenting/1500 Introduction to Curriculum Plus: Five more 3-unit classes Plus: 16 units of degree applicable General Education Units (in any of the following: English/Math OR Science/Social Sciences/Humanities OR Fine Arts) Plus: 6 units of ECE Specialization (Classes can be 'double counted'). See Master Teacher Specializations on following pages. Plus: 2527=2 units of Adult Supervision
Site Supervisor	Required: AA (or 60 units) in ECE including: Required: 1002 Child Development OR 1999 Human Development/1003 Child, Family and Community OR 2500 Family Relationships and Parenting/1500 Introduction to Curriculum Plus: Five more 3-unit classes Plus: 2501 Administration AND 2525 Staffing=6 administrative units Plus: 2527=2 units of Adult Supervision

College of the Siskiyous Instructional Program Review 2019-2020
Submitted: 12/15/2020

- Child Development and Early Education (ECE)
- Patrice Thatcher-Stephens, Program Coordinator Child Development and Early Education, ECE

e) Non-Institutional regulations, policies, standards, and other mandates

Within both California State Title 5 and Title 22 requirements DOJ and California State Penal Code requirements may affect our students' application of Child Development Permit application or employment in a DSS CCL center or program.

Students participating in our clinical Practicum classes must comply with California State SB792 requiring immunizations of all employees and volunteers in a childcare setting who provide "care and supervision" of children. These immunizations include influenza, pertussis, and measles.

Nationally, Head Start Standards inform our course content and SLO's. These standards apply to students whose employment goals include Head Start. Since Siskiyou County is the home of three separate agencies with Head Start grants, Head Start standards significantly affect education and employment in our area.

The National Associate for the Education of Young Children is the professional organization setting the standard to Best Practice in early education. The CAP alignment project reflects NAEYC standards and guides CCC ECE programs. Additionally, the NAEYC through the National Academy of Early Education is the nation al accrediting body for early education programs. Discovery Child Development Center is the only NAEYC Accredited early education program in Siskiyou County. Based on this accreditation our students are given an opportunity to receive clinical practicum practice in a center where Best Practice is a standard.

The California State Department of Education's Transitional Kindergarten initiative has affected CCC ECE programs as primary and elementary teachers return to community colleges to qualify for work with younger children in these classrooms. We have created pathways specifically designed for credentialed primary teachers and have welcomed them into our child development and early education classes.

f) Job Market

Requirements of prospective employers reflect the legal and educational requirement outlined above. Locally, our successful students are almost fully employed. Many students obtain entry-level jobs before starting ECE classes. Additionally, prospective employers value a familiarity with our rural community and the growing diversity of Siskiyou County children.

Unfortunately, with the exception of Head Start and California State Preschool programs Siskiyou County employers often underpay and provide no benefits to new graduates. Fortunately, most COS graduates gain experience and/or their B.A. degrees and move into higher paid Head Start or State Preschool jobs.

In regard to the Job Market, development in the field (both current and future) will continue to reflect the increasingly rigorous standards in early education. It is anticipated that, in California, a very long anticipated renovation of Title 5 and Title 22 standards will reflect the influence of the Transitional Kindergarten Initiative and community standards. If this change occurs, CCC ECE classes and community early education programs will adapt, once again, to changing standards,

The COVID19 Emergency has significantly impacted early education California. We are recognized as essential workers, and the role of child care and the school system in supporting the economy is well documented. California is working diligently to both reorganize the early education landscape—attempting to integrate (for perhaps the 15th time in my experience)-the Title 5/Department of Education and Title 22

Community Care Licensing regulation of early education. This is a work in progress. My personal and professional perspective is that we should be fighting one battle at a time. When the pandemic reaches an acceptable equilibrium, and our communities are safe, that will offer an opportunity to plan. The current best made plans and just that… plans.

ECE@COS will continue to work within the existing system. We work with our cohorts throughout the state to advocate for children and families and to educate early educators to support those families using research based Best Practice and philosophies of education emphasizing tested and implemented methods.

IV. Progress on Outcomes Assessment

Since our 2017-2018 Comprehensive Program Review, the ECE program has continued our ongoing progress on Program Learning Outcomes and Student Learning Outcomes. Please see response to this section, including improvements made as a result of our ongoing assessment, appropriately included in section 1.f.

Institutional Program Effectiveness Indicators:
Please discuss your program's performance on each program specific data item provided by the Research Office.

PIVOT Retention Please see section 1.f

PIVOT Success Please see section 1.f

Student CRN Data: This data is super interesting, I do not see any outstanding or surprising trends. Online students are over all less successful by percentage, and summer students on line appear to be more successful by percentage. I would hypothesize that this is a combination of online detachment, summer-session student commitment, and time to focus on individual classes. There is no disparity between fully time faculty and adjunct faculty. Please see comments in section 1.f. in regard to the data for Spring 2019.

PIVOT High School data shows the overwhelming preponderance of Yreka High School students and supports the ECE Program's physical presence at the Yreka site and the primacy of Yreka, as the county seat and home of the Siskiyou County Office of education. The availability of, and success in, all ECE classes via videoconference negates an argument that the program location determines student enrollment.

PIVOT Race Data Please see discussion in section 1.c

PIVOT Gender Date Please seem the discussion in section 1.c

FTES Please see discussion 1.f

PIVOT Assignment Type As it has been since the beginning…the ECE Program is 40/60 Fulltime/Adjunct. We do fine. I spent my first ten years at College of the Siskiyous arguing for another full- time instructor. Once we actually got on the hiring list. However, I understand that this is not a priority. We are a relatively low FTES program and it is a monetary decision.

As the argument goes, full time instructors—in any area- are invested, connected and supportive in ways that those with other 'day jobs' just cannot be. Our students, the community and the program would benefit from that. On the other hand, our adjuncts are well qualified, connected to the community and hard working.

V. Other Unit-Specific Quantitative and Qualitative Research: Please provide

a) List of any quantitative or qualitative measures not provided in the previous questions that you have chosen to gauge your program's effectiveness (e.g., transfers, degrees, certificates, satisfaction, student contacts, student headcount, Perkin's data, equity data, etc.)

Child Development Permits California offers six levels of Child Development Permits, each with its own set of issuance requirements and each authorizing the holder to perform different levels of service in child development programs. The State Permits are issued by the California Department of Education, the same agency that issues Teaching Credentials for Public School Teaching. Permits are required if you work for a school that is funded by the Department of Education or Head Start.

The ECE Program at College of the Siskiyous does not award "Certificates" rather we encourage and scaffold students' application for a CCT Child Development Permit. These permits, unlike certificates, are recognized in early education and qualify students to work in early education programs. Each year 7-10 current or former COS students apply and receive Child Development permits.

Perkins Data is collected through the federal government in support of the Carl D. Perkins Career and Technical Education Act of 2007. Data is sourced from community colleges, trade schools and other state and county agencies. The CTE Perkins Coordinator has contacted CTE programs, including ECE. We appreciate this interest. The assembled data was shared with me, as Program Coordinator. As a result, I understand that our program is failing to meet Non-Traditional student equity goals. This is understandable. ECE is a 'woman heavy' profession for historic and economic reasons.

Perkins employment data was disappointing and does not seem experientially or anecdotally correct. Please refer to "Regional Labor Market Assessment" from the CTE North Far North Region Center on Excellence at
http://www.siskiyous.edu/cte/ece/ for current local data.

b) A summary of the results of these measures indicates that Child Development Permits are important and valuable indicators of student success. Additionally, accurate data that reflects employment is necessary.

c) What did you learn from your evaluation of these measures, and what improvements have you implemented or do you plan to implement as a result of your analysis of these measures? Please see Four Year-Action Plan.

VI. Evaluation: Based upon and not repeating the descriptions you provided in Question 1 and the responses provided in Questions 2 – 5, please provide an analysis of what is going well and why and what is not going well and why, in any of the following areas that are relevant to your program:

a) Representativeness of population served

In regard to Ethnicity and Race, as a result of the ever-increasing number of students we are recruiting from throughout California, our population is very representative and appropriate for those working desiring to work in early education in California. This is significant important in supporting College of the Siskiyous' and the California Community College System's commitment to Equity and Social Justice.

In regard to gender, we are representative of current practice and intend to investigate ways to mediate for lack of nontraditional students.

b) Alternative modes and schedules of delivery (e.g., online, hybrid, early morning, evening services)
ECE had a long history of getting to students where they are when they need classes. Please see Four Year Action Plan.

c) Partnerships (internal and external)

Externally ECE@COS is a recognized model of collaboration. In a huge county, with few people, agencies learn to work together. Internally, we would very much like to see CTE become a more collaborative program. There is special interest in an area of Family and Community Service, connecting ECE and the Alcohol Drug and Human Services Program. It remains a mystery, and regret, that the Foster Kinship Care Education Program, once a strong part of the ECE Program has been removed from our oversight.

d) Innovation and implementation of best practices

In early education, Best Practice is embedded in everything that we do. The educational philosophies that we teach in our classes guide our work as educators. Assessment, Observation and Evaluation are as central to each class session as they are to our students' work with children and families.

e) Efficiency in operations

We are efficient. See our budget and class scheduling.

f) Efficiency in resource use

See above.

g) Staffing

Please see 4. PIVOT Assignment Type

h) Participation in shared governance (e.g., do unit members feel they participate effectively in planning and decision-making?)

The Program Coordinator has a long history of active and involved participation in shared governance. Adjunct Instructor and Program Coordinator interact often and meet each semester to plan and assess.

i) Professional development and training

Through professional organizations, NAEYC, CDTC, PITC, ESTEM, QRIS, Head Start, CCCECE and others the Program Coordinator and Adjunct Instructors remain current and active in local, state professional development.

j) Compliance with applicable mandates

The ECE Program is currently in compliance with internal and external program mandates.

VII. Vision. Tell us your unit's vision: Where would you like your program to be four years from now? Dream big while considering any upcoming changes (e.g., new buildings, labs, growth, changes in the discipline, etc.)

We visualize that the Child Development and Early Education Program will maintain its role as an aligned and committed member of the CCC ECE community. We will continue to serve our students, and the children and families in Siskiyou County and to collaborate with the myriad of agencies that are part of our network.

We hope to expand our aligned and mapped courses to allow us to serve students within the context of workforce development which is heavily invested in alignment and mapping. Our core course will remain constant. However, as the field grows and expands to meet greater demand, both for services and for skills, We will add additions course of study options to meet, those needs.

Please see my statement in section III.f in regard to rebuilding planes while you are flying them through a storm. Right now, our most significant vision for ECE@COS is that we navigate this current era and continue to serve the needs of children and families in Siskiyou County.

We are dreaming just the right size for right now.

VIII. Progress on Prior Goals: Briefly summarize any progress your unit has made in meeting the goals and objectives identified in the program's last Four-Year Action Plan.

My responses from the previous Comprehensive Program Review are below in blue.

New 2018 Long Range Planning Goals formulated to maintain or enhance program strengths and to address identified challenges. In addition to the ongoing Goals above

- Goal: The ECE Program looks forward to being a part of the renewal of the Career and Technical Education area under a new dean.
    - Objective
        - Participate vigorously in Perkins initiatives and meet Perkins standards for success and retention.
    - Resources
        - Perkins specialist in collaboration with CTE Deem
    - Actions
        - Increase Non-Traditional Enrollment
        - Use Perkins Funding to allow our program to hire assistance to map courses in order to attract non-traditional students to workplace via our classes.

COMPLETED

- Goal: Continue to maintain a model early childhood program at Discovery Child Development Center and in ECE@COS which exemplifies Best Practice in early education and the education of early educators.
    - Objectives

College of the Siskiyous Instructional Program Review 2019-2020
Submitted: 12/15/2020

- Child Development and Early Education (ECE)
- Patrice Thatcher-Stephens, Program Coordinator Child Development and Early Education, ECE

        - Maintain NAEYC Accreditation
        - Create outdoor space which reflects standards taught in our ECE Program
        - Offer trained Student Worker staffing to allow the Discovery Child Development Center staff to meet the needs of our practicum students.

COMPLETED

    - Resources
        - District Budget support to pay the portion of the accreditation fees for which COS is responsible per our MOU.
        - District or Perkins funding which allows ECE@COS to contribute to the upcoming renovation of the outside play area.
        - Perkins funding to support one student worker
    - Actions
        - Hire a CTE Dean
        - Continued collaboration with Shasta Head Start per existing MOU
        - Outdoor renovation per existing maintenance request.

COMPLETED

- Goal: Map ECE Programs to the Early Childhood Educator's Mapping Tool
    - Objectives
        - Use the web-based ECE Competencies Mapping Tool to compare their courses and trainings with the ECE Competencies.
    - Bring College of the Siskiyous into alignment with CCC ECE Programs using this tool as indices of Best Practice in community college education. Through the mapping process, faculty can determine how thoroughly competencies are addressed within our curriculum and program.
    - Resources
        - Perkins Budget support to support hiring of adjunct faculty person to align our Core Courses to the ECE Competencies Mapping Tool
    - Actions
        - Hire Adjunct to begin project
        - Complete mapping of CAP Classes
        - Submit to Child Development Training Consortium for review.

IN PROCESS AND FUNDED PENDING RESOLUTION OF CONTRACT NEGOTIATION GRID LOCK

- Goal: Maintain currency and access Distance Learning Methods of Instruction
    - Objectives
        - Online Classes
            - Continue to maximize current rotation of Canvas appropriate ECE classes to attract optimum enrollment.
                - Align online ECE Program courses with OEI standards to increase access for a broader student base.

        - Continue to use the Videoconference format to offer FTF/Videoconference sections of ECE classes throughout Siskiyou County.
            - Collaborate with COS Distance Learning to use of most efficient and accessible videoconference LMS, e.g. transition from video bridge to "Zoom".
            - Support colleagues from other areas of instruction in appropriately utilizing this MOI.
    - CCCCO supported OEI training and certification
    - COS Distance Learning Staff
  - Actions
    - Beginning in spring of 2019 ECE instructors will begin to align appropriate classes with OEI.
    - Beginning in spring of 2019 ECE instructors will participate in training to maximize our use of emerging platforms.

COMPLETE WITH EXCEPTION OF OEI ALIGNMENT INTERRUPTED BY COVID19 EMERGENCY

IX. 2020-2021 Long Range Planning Goals formulated to maintain or enhance program strengths and to address identified challenges.

- OEI Training and Program Preparation per above with an extended timeline. The long-term goal is to translate ECE@COS into an online degree program while maintaining Best Practice, enrollment, and locally relevant community involvement. This includes FTF/VC classes as appropriate.
- Align our Core Courses to the ECE Competencies Mapping Tool per above. This initiative is vital to meeting ECE Guided Pathways goals and is fully funded and pending per gridlocked contract negotiations.
- Meet ECE@COS' MOU obligation to Maintain Discovery Child Development Center NAEYC Accreditation.
- Maintain materials and equipment necessary to demonstrate Best Practices in Early Education in Lecture and Lab classes
- Accommodate and assimilate ECE@COS Program as the State of California realigns its K-12/Early Education Plan per Master Plan for Early Learning and Care
