College of the Siskiyous Comprehensive Program Review 2023-2024
Submitted: 12/16/2024

- Early Childhood Education and Child Development (ECE)
- Patrice Thatcher-Stephens, Program Coordinator

1. Description of Program:

a) Organization Staffing and Structure:

The ECE—Child Development, Family and Education Program is organized as a Career and Technical Education Program under the purview of the Interim Dean of CTE as follows

- President/Superintendent of College of the Siskiyous
- Vice President of Academic Affairs
- Interim Dean Career and Technical Education
- Program Coordinator and Full Time Tenured Instructor
- Experienced and fully qualified Adjuncts hired on semester by semester basis

b) Primary Purpose:

The ECE Program at College of the Siskiyous serves two equally important purposes. We prepare front-line early educators for work throughout the geographical and expanded online area served by the college. Equally importantly, we prepare students for transfer to 4-year institutions through our ADT degrees. Additionally, our course of study provides the classes required through CDE Title 5 Child Development Permits.

c) Whom we Serve

Geographic Service Area

Siskiyou County, adjacent to Oregon in the northern, inland region of California, is the fifth largest county in the state. More than sixty percent of Siskiyou County's land is managed by federal and state government agencies. These include the USDA Forest Service, the Bureau of Land Management, the U.S. Fish and Wildlife Service, and the California Department of Fish and Game. The county's 6,347 square miles encompass a wide variety of geographic areas and community structures.

Siskiyou County is one of the most sparsely populated counties in California. Our students have historically been spread throughout an area averaging approximately seven persons per square mile. Our students are often geographically isolated and served through videoconference sites throughout the county as well as at the main Campus in Weed and our site in Yreka. Our ECE@COS students are both service providers and clients of family support services. The primary employers of College of the Siskiyous Early Childhood Education students are the California State Preschool, as administered through various entities, Head Start and Early Head Start, as administered through four different entities and a few local independent early education programs. We also serve family childcare providers. For over 20 years, using videoconference and online technology, we reached far distant sites in Siskiyou County. Based on research indicating that online instruction is not Best Practice in training hands-on early educators, we resisted offering Core Classes online in spite of increasing success rates, excellent online instructors, and cohorts of technically sophisticated students throughout California consistently requesting that they be able to complete the degree online.

The COVID19 Emergency, significantly impacted our Methods of Instruction, and, ultimately, our geographic service area beginning in February of Spring Semester 2021. ECE@COS-and virtually all CCC ECE-CD programs throughout the state- responded immediately and effectively to new circumstances. This necessity, in effect, created an online program/Zoom MOI serving students throughout the state. These changes are apparently destined to far outlive the COVID 19 emergency.

College of the Siskiyous Comprehensive Program Review 2023-2024

- Early Childhood Education and Child Development (ECE)
- Patrice Thatcher-Stephens, Program Coordinator

d) Services Provided and e) Delivery Methods

ECE@COS continues to prepare front-line early educators for work throughout the geographical and expanded online area served by the college. Equally importantly, we prepare students for transfer to 4-year institutions through our ADT degrees. Additionally, our course of study provides the classes required through CDE Title 5 Child Development Permits. Based on our 2023 Student Location Matrix and Planning documents, our services are specifically designed to serve both local and distant students as they prepare to enter the ever-evolving field of Early Education.

As we prepare these students we are serving families in Siskiyou County and beyond. Through our Advisory Committee Network, we build upon collaboration with our partners locally and statewide.

Our course of study offers a rigorous and realistic curriculum. Our courses are behind in the process of Curriculum Committee Program Update. We need to catch up on "routine maintenance". Unfortunately, we have been distracted during the past year by challenges in restructuring our lab school collaboration and becoming reaccredited through the National Association for the Education of Young Children, NAEYC. Maintaining effective Practicum and Observation sites is dependent on our work with the California Early Childhood Mentor Program and our collaborating agency.

Following the Two-Year Course Rotation, students continue to be able to complete a local A.A. Degree, a Transfer Degree to any California State University or articulate, as a junior, to Southern Oregon University's online Early Childhood Development Program. In this pattern all ECE@COS classes are offered through Distance Learning.

Our Rotation of Courses continues to offer classes leading to all levels of California State Child Development Permits issued through the California State Department Commission on Teacher Credentialing. In these patterns all ECE@COS courses are offered through Distance Learning.
Our Rotation of Courses continues to offer classes leading to all levels early educator qualifications included in Title 22 Division 12 from the California State Department of Social Services Community Care Licensing, Teacher Qualifications. In this pattern all ECE@COS courses are offered through Distance Learning.

Actual Students Served and Services Provided

Our students range in age and demographics from AP high school students or recent high school graduates, living at home or in the on-campus dorms, to experienced early educators near retirement age who are challenged to meet the increasing education requirements in our field.

Our students are primarily female, although we are making gradual, but steady, progress enrolling Perkins Defined Special Populations. A number of males in our ECE and General Education Classes. We currently have 2 active and committed males in the program. We collaborate effectively with Student Access Services to serve eligible students with a wide variety of special needs ranging from cerebral palsy to dyslexia to profound deafness.

Ethnicity and Race

Based on data from the Annie E. Casey Foundation "Kids County Data Center", reflecting through 2018 and most recent census data, the total population of Siskiyou County The 5 largest ethnic groups in Siskiyou County, CA are White 83%, Latino 14%, American Indian & Alaska Native 5.2%, Asian 1.7%, Pacific Islander .4%, Multiracial 5.8%. Interestingly the addition of the Multiracial category is reflected in decreased numbers identified in all single- race categories. Annie E. Casey Data

The ECE@COS data on race is interesting and moderately encouraging. Our students—who will work with the children reflected in the Annie E. Casey Foundation "Kids County Data Center 2022"- are far more diverse than the general adult population in our county.

Program Services and Methods of Delivery

- We have not historically provided Noncredit Courses. Non-credit classes do not meet the academic, permit and transfer needs, of our students. Combined with the promotion of Dual and Concurrent Enrollment classes- this was just too many moving parts. However, beginning in 2024 we are in collaboration with Adult Education and Yreka High School to support their initiative to offer Early Childhood Education "pre-degree" classes, noncredit, but reflecting the philosophy and intent of ECE@COS classes.
- We do not provide Basic Skills Courses.
    - Basic Skills classes do not meet the academic, permit and transfer needs, of our students.
    - We *do* value COS's Basic Skills preparation and these courses support out students' success. Through the CDTC subsidy program (see below) we award a cash stipend to qualifying students for Basic Skills units.
- Degree Applicable, Transfer Level and AD-T Classes Face-to-Face/Videoconferenced/Online
    - Local A.A. Degrees
    - AD-T Degrees
    - Child Development Permits at all levels through the Commission on Teacher Credentialing
- Supplemental academic support relating to Counseling/Advising
    - Delivered through consistent and collaborative work with COS academic advisors and counselors. The COVID 19 Emergency prompted our Counseling and Advising Services to expand access to their services to online students.
    - Through our consistent Two-Year Course Rotation and our ECE @COS Program Guide we offer students a clear road map to meeting their educational and professional goals.
- We provide exemplary support for students with Special Needs and Disabilities.
    - Delivered through collaboration with COS' SAS program.

- Early Childhood Education and Child Development (ECE)
- Patrice Thatcher-Stephens, Program Coordinator
- Program Coordinator works with ECE Curriculum Alignment Project Work group and monitors CAP alignment at College of the Siskiyous. This initiative led directly to our early approval as an ECE AD-T degree through the CCCCO.
    - Delivered through statewide collaboration with early education partners.
- Student-Centered enrollment tracking and class scheduling.
    - Delivered through consistent monitoring and student survey.
- Local collaboration will allow College of the Siskiyous to have an onsite Practicum site at Discovery Child Development Center once the program is reaccredited.
    - Delivered through the establishment of an ongoing COS MOU.
- Program Coordinator serves on California early Childhood Mentor Teacher team, working to provide practicum sites throughout the county.
    - Delivered through site evaluations and Mentor/Director Program assessment.
- Program Director offers support and referral to students in Child Development Permit Application, degree completion, transfer information and referral to support as needed through
    - Assessment of CHILD Development Permit applications.
    - Collaboration with community partners in accessing support available through
    - CDE Child Development Division
    - QRIS- Quality Rating Improvement System
    - First Five Siskiyou
- Program Director represents College of the Siskiyous on the Siskiyou (formerly Siskiyou-Shasta) Quality Rating Improvement System team.
    - Delivered through collaboration with local partners to implement the QRIS finding through which our county receives state and federal quality improvement funding for early education programs.
- Schedule and organize Advisory Committee Meetings.
- The Program Coordinator prepares and submits College of the Siskiyous ECE Program Annual Report to Siskiyou early education network partners.

f) Curriculum is up-to-date and needs based.

In 2023 Academic Year ECE@COS updated and reviewed all classes through the Curriculum Committee. Through this process we responded to program needs and requirements identified in the Program Update, College of the Siskiyous' Board Policies and Administrative Procedures, our CTE Advisory Committee feedback, Student surveys and faculty input. Our updates reflect Outcomes Assessment as mandated through the SLO Assessment Committee.

As part of this process we:

College of the Siskiyous Comprehensive Program Review 2023-2024
Submitted: 12/16/2024

- Early Childhood Education and Child Development (ECE)
- Patrice Thatcher-Stephens, Program Coordinator
    - Aligned our Student Learning Outcomes with C-ID standards for our CID classes-those COS Child Development, Family, and Education courses which articulate to other California Community Colleges, California State Universities, the University of California system and (at COS) Southern Oregon University.
    - Added Learning Objectives, not typically included in College of the Siskiyous' COR's- Course Outlines of Record-to reflect C-ID standards.
    - Revised some Student Learning Outcomes to reflect Best Practice and assure that SLO's are measurable and concise.
    - Updated all Distance Learning Addendums for our DL classes.
    - Sent all course catalogue data through technical review.
    - We adjusted our ECE 2502 Practicum class units to 1-unit Lecture with 3 units of lab to facilitate articulation to Southern Oregon University and application to Commission on Teacher Credentialing Child Development Permit requirements.

PIVOT STUDENT SUCCESS RATE and FTES

Year	Duplicated Head Count	ECE Graduates
Spring 2020	COVID	
2020-21	327	6
2021-22	307	8
2022-23	357	19
2023-24	367	9

ECE Program at COS became early adopters of online LMS's, first ETUDES and now Canvas and "hybrid" Canvas/Zoom classes. Since Spring 2020 our classes have been available entirely online, sometimes augmented by synchronous Zoom meetings. As in Distance Learning in general, we found that our new cohorts of students represent a different demographic than prior Face-to-Face/Videoconference cohorts. The COVID 19 Emergency triggered changes in both Modes of Instruction and Emergency Withdrawal protocol. FTES decrease significantly as students who were adversely affected by the pandemic left classes.

Any decrease in FTES/Retention/Success Rates related to the COVID Emergency are both broadly anomalous and individually understandable. Graduation rates remained stable, increasing slightly through Spring 2020. This reflected steady program growth over the preceding 10 years. The effects of disruption to College of the Siskiyous' and ECE@COS' processes and strategy are reflected in substantial decrease is graduates in spring 2021 and 2022. We graduated students who persevered in their course of study to complete their degrees. However, these numbers also reflect the interruption of our established course of study by the disruption of face-to-face instruction. In spring 2023 we rebounded, wrangling students whose progress had been interrupted and adding a few who were able to take advantage of our wider geographic area. Seem PIVOT data above.

ECE@COS, and, in fact, COS in general, continues to be challenged in designing programs that both build upon the advantages of our expanded and positively evolving Distance Learning opportunities and maintaining the core values of personal connection and accessibility. Current initiatives to reimagine our Lab

College of the Siskiyous Comprehensive Program Review 2023-2024

- Early Childhood Education and Child Development (ECE)
- Patrice Thatcher-Stephens, Program Coordinator

School into a Distance Learning environment, increase face-to-face/synchronous Zoom and Hybrid Methods of Instruction reflect our commitment to constant improvement and appropriate response to current higher education reality.

Various program at College of the Siskiyous are discovering what Methods of Instruction best serve their needs. For example, CTE programs often find that face-to-face instruction is necessary, effective, and appropriate for the students they serve. Some General Education programs are primarily online, while others best serve their students face-to-face. ECE@COS had historically used face-to-face/videoconference to serve our students in Siskiyou and Modoc Counties. Subsequent to the accommodations described above we found that we needed to make data based decisions in regard to Methods of Instruction. In spring 2023 we surveyed our population to get an accurate snapshot of our current geographic distribution of students.

College of the Siskiyous Comprehensive Program Review 2023-2024
Submitted: 12/16/2024

- Early Childhood Education and Child Development (ECE)
- Patrice Thatcher-Stephens, Program Coordinator

This data illustrates the locations served by ECE@COS. Without our historic ability to videoconference to distant sites, the most effective way to meet the needs of the most students is Online-Zoom Methods of Instruction. Please see this link to view the departmental discussion.

ECE@COS Planning Power Point

g) Provide a breakdown of the classes offered in your areas within the Program Review cycle.

The Program Review Cycle at College of the Siskiyous has become significantly better monitored and aligned over the past two years. As always, ECE, as a Career and Technical Education program, has completed a program review every two years. The required format has become more consistent as we use an Annual Update to reflect on the progress toward two-year goals; review our SLO assessment rotation and MOI's. It is a joy to have a competent and engaged team responsible for providing the needed data and administrative support for these reviews.

ECE Classes by Semester Classes required for degrees are in BLUE

Please refer to the "Guide to ECE@COS" posted on our Program Homepage https://www.siskiyous.edu/cte/ece/

Fall Classes

ECE 1001 Introduction to ECE Principles, Practices and Standards: This is the introductory class. It is a CORE class required for the A.S./A.S.-T/Permits/Title 22 requirements. It is offered every fall.

ECE 1002 Child Development: This is a CORE class required for the A.S./A.S.-T/Permits/Title 22 requirements. This class also satisfies the G.E. Social Sciences requirement. It is offered every fall.

ECE 1003 Child, Family and Community: This is a CORE class required for the A.S./A.S.-T/Child Development Permits/Title 22 requirements. This class also satisfies the G.E. Social Sciences requirement. It is offered every fall.

ECE 2000 Observing and Assessing--Desired Results and Developmentally Appropriate Environments: This class is required for the A.S./A.S.-T/Advanced Permits. It is an advanced class—students should complete, or be enrolled in, the majority of their CORE classes before enrolling in this class. It is offered every fall.

ECE 2002 Child Nutrition Health and Safety: This class is required for the A.S./A.S.-T/Advanced Permits. It is an advanced class—students should complete, or be enrolled in, the majority of their CORE classes before enrolling in this class. It is offered every fall.

ECE 1999 Human Development: This class is NOT required for the A.S./A.S.-T/Child Development Permits. However, it does satisfy a CORE class requirement (can replace ECE 1002) for the Child Development Permit. This class also satisfies the G.E. Social Sciences requirement. It is offered every fall and spring.

ECE 2003 Serving Children and Families with Special Needs: This class is NOT required for the A.S./A.S.-T/satisfies Master Teacher Permit specialization. It is offered in the spring.

ECE 2527 Supervision of Adult Staff in Early Education: This class is NOT required for the A.S./A.S.-T/required for Site Supervisor or Program Director Permits/required for Mentor Teachers. It is offered in the fall.

Spring Classes

ECE 1500 Introduction to Curriculum: This is a CORE class required for the A.S./A.S.-T/Child Development Permits/Title 22 requirements. It is offered every spring.

ECE 1501 Positive Child Guidance: This class is NOT required for the A.S./A.S.-T/ applies to Master Teacher Permit Specializations. It is offered in the spring.

ECE 1502 Serving Children and Families in a Diverse Society: This is a class required for the A.S./A.S.-T/ applies to Master Teacher Permit Specializations. This class also satisfies the G.E. Diversity requirement. Check the Course Schedule for availability I tis offered every year either in fall or spring.

ECE 1999 Human Development: See Above

ECE 2500 Family Relationships and Parenting: This class is NOT required for the A.S./A.S.-T/ applies to Master Teacher Permit Specializations. However, it does satisfy a CORE class requirement (can replace ECE 1003) for the Child Development Permit. This class also satisfies the G.E. Diversity requirement. It is offered in the spring.

ECE 2501 Administration: This class is NOT required for the A.S./A.S.-T/ required for Site Supervisor or Program Director Permits/required for Mentor Teachers. It is offered in the spring.

- Early Childhood Education and Child Development (ECE)
- Patrice Thatcher-Stephens, Program Coordinator

ECE 2502 Practicum: This is a class required for the A.S./A.S.-T/ Child Development Permits. This is a lecture/Lab class requiring 6 per week hours of work in an approved early education program. The California State Department of Education and Community Care Licensing Department of Social Services requires that students satisfy immunization requirements. See most current Update on following pages. It is offered in the spring.

ECE 2510 Creative Art Activities: This class is NOT required for the A.S./A.S.-T/ applies to Master Teacher Permit Specializations. It is offered in the spring.

2. External Factors with Significant Impact: What external factors have a significant impact on your program?

a) Budgetary constraints and opportunities.

During the 2023-24 academic year, ECE@COS benefitted from significant budgetary support based on our ability to adapt and retain enrollment. Perkins funding supported a transformation of the Lab School into a potential Zoom teaching space.

b) Competition from other institutions.

We prefer to collaborate rather than compete. The majority of ECE programs and degrees at CCC's throughout California are aligned. Many have classes available online. Of course, we welcome transfer students from other CCC's. We offer our own aligned classes online and meet students enrolled at our cohort colleges online. When helpful and appropriate we refer our students, who need classes.

On the other hand, the promulgation of for-profit online institutions, while not specifically affecting our core program, increasingly affects the quality of the course of study available to educators, and early educators. Online education is great. Accessibility is important. Quality is fundamental.

Then, there are the California State Universities. The California State Department of Education's Transitional Kindergarten initiative has affected CCC ECE programs as primary and elementary teachers return to community colleges to qualify for work with younger children in these classrooms. We initially created pathways specifically designed for credentialed primary teachers and welcome them into our Early Childhood Education and Child Development classes. Year's of work and CCC's excitement at being included in teacher preparation was met by a turf war initiated by CSU's. This is discouraging and disappointing. We are virtually excluded from work specific to preparing teacher for TK or for the always elusive P3 Credential.

Related to this, somehow…is the school district's cannibalizing of the California State Preschool structure to move under-age children to TK, out of CSPS without appropriate attention to Developmental Theory. To be continued.

c) Requirements of four-year institutions

Because our program is aligned through CAP and is an AD-T program with an articulation agreement with Southern Oregon University, we benefit for the oversight and rigorous academic requirements included in those agreements.

d) Institutional regulation, policies, standards, and other mandates

College of the Siskiyous Comprehensive Program Review 2023-2024
Submitted: 12/16/2024

- Early Childhood Education and Child Development (ECE)
- Patrice Thatcher-Stephens, Program Coordinator

The Early Childhood Education and Child Development Program at College of the Siskiyous prepares students for Title 5 Child Development Permits issued through the California State Department of Education Commission on Teacher Credentialing. Beyond the course work required for our local A.A. and AD-T degrees, we offer classes fulfilling the CTC requirements. Our program offers classes meeting the Title 22 Department of Social Services Community Care Licensing requirements for teachers employed in independent early education programs.

In addition to offering these classes, we direct students to appropriate 'permit' classes, scaffold permit application and refer students to sources of funding as appropriate. See following page.

Child Development Permit Matrix –College of the Siskiyous Classes Meeting Education Requirements for Matrix Option 1	
Assistant Teacher	6 units of any ECE COS classes (2 3-unit classes)
Associate Teacher	Required: 1002 Child Development OR 1999 Human Development/1003 Child, Family and Community OR 2500 Family Relationships and Parenting/1500 Introduction to Curriculum. Plus: One more 3-unit class
Teacher	Required: 1002 Child Development OR 1999 Human Development/1003 Child, Family and Community OR 2500 Family Relationships and Parenting/1500 Introduction to Curriculum Plus: Five more 3-unit classes Plus: 16 units of degree applicable General Education Units (in any of the following: English/Math OR Science/Social Sciences/Humanities OR Fine Arts)
Master Teacher	Required: 1002 Child Development OR 1999 Human Development/1003 Child, Family and Community OR 2500 Family Relationships and Parenting/1500 Introduction to Curriculum Plus: Five more 3-unit classes Plus: 16 units of degree applicable General Education Units (in any of the following: English/Math OR Science/Social Sciences/Humanities OR Fine Arts) Plus: 6 units of ECE Specialization (Classes can be 'double counted'). See Master Teacher Specializations on following pages. Plus: 2527=2 units of Adult Supervision
Site Supervisor	Required: AA (or 60 units) in ECE including: Required: 1002 Child Development OR 1999 Human Development/1003 Child, Family and Community OR 2500 Family Relationships and Parenting/1500 Introduction to Curriculum Plus: Five more 3-unit classes Plus: 2501 Administration AND 2525 Staffing=6 administrative units Plus: 2527=2 units of Adult Supervision

e) Non-Institutional regulations, policies, standards, and other mandates

Within both California State Title 5 and Title 22 requirements DOJ and California State Penal Code requirements may affect our students' application of Child Development Permit application or employment in a DSS CCL center or program. Students participating in our clinical Practicum classes must comply with California State SB792 requiring immunizations of all employees and volunteers in a childcare setting who provide "care and supervision" of children. These immunizations include influenza, pertussis, and measles.

Nationally, Head Start Standards inform our course content and SLO's. These standards apply to students whose employment goals include Head Start. Since Siskiyou County is the home of three separate agencies with Head Start grants, Head Start standards significantly affect education and employment in our area.

The National Associate for the Education of Young Children is the professional organization setting the standard to Best Practice in early education. The CAP alignment project reflects NAEYC standards and guides CCC ECE programs. Additionally, the NAEYC through the National Academy of Early Education is the nation al accrediting body for early education programs. Discovery Child Development Center is the only NAEYC Accredited early education program in Siskiyou County. Based on this accreditation our students are given an opportunity to receive clinical practicum practice in a center where Best Practice is a standard.

The CDE's Transitional Kindergarten initiative has affected CCC ECE programs as primary and elementary teachers return to community colleges to qualify for work with younger children in these classrooms. CCC's designed a system to accommodate these students. See 2b above.

f) Job Market

- **Employer Requirements**

- Early Childhood Education and Child Development (ECE)
- Patrice Thatcher-Stephens, Program Coordinator

Requirements of prospective employers reflect the legal and educational requirement outlined above. Locally, our successful students are almost fully employed. Many students obtain entry-level jobs before starting ECE classes. This reflects our alignment with both Title 5 and Title 22 standards. Additionally, prospective employers value a familiarity with our rural community and the growing diversity of Siskiyou County children.

Unfortunately, with the exception of Head Start and California State Preschool programs, Siskiyou County employers often underpay and provide no benefits to new graduates. Fortunately, most COS graduates gain experience and/or their B.A. degrees and move into higher paid Head Start or State Preschool jobs.

- **Developments in the Field**

In regard to the Job Market, development in the field (both current and future) will continue to reflect the increasingly rigorous standards in early education. It is anticipated that, in California, a very long anticipated renovation of Title 5 and Title 22 standards will reflect the influence of the Transitional Kindergarten Initiative, the P3Credential, and community standards. If this change occurs, CCC ECE classes and community early education programs will adapt, once again, to changing standards,

ECE@COS will continue to work within the existing system. We work with our cohorts throughout the state to advocate for children and families and to educate early educators to support those families using research based Best Practice and philosophies of education emphasizing tested and implemented methods.

3. Progress on Outcomes Assessment:

The ECE program has traditionally maintained a schedule of Program Learning Outcomes and Student Learning Outcomes Assessment. Please see response to this section, including improvements made as a result of our ongoing assessment. See 1(f) above re course updates. We are committed to aligning our Course SLO's with Program SLO's. This initiative was advanced through the work of the College of the Siskiyous Academic Senate SLO Committee over the past 2 years.

4. Institutional Program Effectiveness Indicators

First, what is working. The CTE Program seems to be functioning well. The recent administrative turnover in CTE program administration has been pretty seamless, in our program's experience. Our administrators are skilled and accessible. Processes—e.g. Program Review are defined and monitored. Since Career and Technical Education is the immediate context in which ECE exists, we remain very grateful. However, the college continues to need to clearly define itself and commit to a reasonable size, methods of instruction and administrative structure. Our Human Resource staff still appears challenged in meeting HR needs. Our IT department staff are individually very skilled and helpful. wonderful. However, it seems impossible to accomplish any technical renovation or assessment. Our Maintenance people are, apparently, overworked, but we still need to be able to depend upon them. The Office of Instruction seems to have made impressive progress in hiring and cross training. Like I said a year ago, we're tired. We are going to continue to be tired if we don't hire the staff to do the work that needs to be done.

Institutional Program Effectiveness Indicators:
Please discuss your program's performance on each program specific data item provided by the Research Office.

- Early Childhood Education and Child Development (ECE)
- Patrice Thatcher-Stephens, Program Coordinator

PIVOT Retention Please see section 1.f

PIVOT Success Please see section 1.f

Student CRN Data: This data is super interesting, I do not see any outstanding or surprising trends. Online students are over all less successful by percentage, and summer students on line appear to be more successful by percentage. I would hypothesize that this is a combination of online detachment, summer-session student commitment, and time to focus on individual classes. There is no disparity between fully time faculty and adjunct faculty.

PIVOT Race Data Please see discussion in section 1.c

PIVOT Gender Date Please seem the discussion in section 1.c

FTES Please see discussion 1.f

PIVOT Assignment Type is it has been since the beginning…the ECE Program is 40/60 Fulltime/Adjunct. We do fine. I spent my first ten years at College of the Siskiyous arguing for another full- time instructor. Once we actually got on the hiring list. However, I understand that this is not a priority. We are a relatively low FTES program and it is a monetary decision.

As the argument goes, full time instructors—in any area- are invested, connected and supportive in ways that those with other 'day jobs' just cannot be. Our students, the community and the program would benefit from that. On the other hand, our adjuncts are well qualified, connected to the community and hard working.

5. Other Unit-Specific Quantitative and Qualitative Research: Please provide

a) List of any quantitative or qualitative measures not provided in the previous questions that you have chosen to gauge your program's effectiveness (e.g., transfers, degrees, certificates, satisfaction, student contacts, student headcount, Perkin's data, equity data, etc.)

Child Development Permits California offers six levels of Child Development Permits, each with its own set of issuance requirements and each authorizing the holder to perform different levels of service in child development programs. The State Permits are issued by the California Department of Education, the same agency that issues Teaching Credentials for Public School Teaching. Permits are required if you work for a school that is funded by the Department of Education or Head Start.

The ECE Program at College of the Siskiyous does not award "Certificates" rather we encourage and scaffold students' application for a CCT Child Development Permit. These permits, unlike certificates, are recognized in early education and qualify students to work in early education programs. Each year 7-10 current or former COS students apply and receive Child Development permits.

Perkins Data is collected through the federal government in support of the Carl D. Perkins Career and Technical Education Act of 2007. Data is sourced from community colleges, trade schools and other state and county agencies. The CTE Perkins Coordinator has contacted CTE programs, including ECE. We appreciate this interest. The assembled data was shared with me, as Program Coordinator. As a result, I understand that our program is failing to meet Non-Traditional student equity goals. This is understandable. ECE is a 'woman heavy' profession for historic and economic reasons.

North Far North Regional Labor Market Assessment reflects regional trends, but does not sufficiently recognize the unique aspects of Siskiyou. Please refer to "Regional Labor Market Assessment" from the CTE North Far North Region Center on Excellence at http://www.siskiyous.edu/cte/ece/ for current local data.

NAEYC Accreditation process continues to be challenging. This is the gold standard for assessing early education environments. We struggle to meet these standards. This is primarily the result of the Child

Development and Early Education's Program Director's badly informed decision in entering into an MOU with an unprepared agency. The program is currently on Step 1 Enrollment and gathering documentation required to complete Step 2 Application. See https://www.naeyc.org/accreditation

b) A summary of the results of these measures indicates that **Child Development Permits** are important and valuable indicators of student success. **Perkins Data** appears to accurately reflect current workplace conditions. Additionally, accurate data that reflects employment is necessary. **NFN Regional Center** is a fairly accurate source for employment data for Siskiyous County. The **NAEYC Accreditation Site** is the source for guiding programs through the complex accreditation process and is not easily navigable. They do offer individual program assistance. We have A January meeting scheduled.

c) Please see comments included in the context of 5a).

6. Evaluation: Based upon and not repeating the descriptions you provided in Question 1 and the responses provided in Questions 2 – 5, please provide an analysis of what is going well and why and what is not going well and why, in any of the following areas that are relevant to your program:

a) Representativeness of population served

In regard to Ethnicity and Race, as a result of the ever-increasing number of students we are recruiting from throughout California, our population is very representative and appropriate for those working desiring to work in early education in California. This is significantly important in supporting College of the Siskiyous' and the California Community College System's commitment to Equity and Social Justice.

Regarding gender, we are representative of current practice have come to understand that this inequity is systemic and not unique.

b) Alternative modes and schedules of delivery (e.g., online, hybrid, early morning, evening services)

ECE had a long history of getting to students where they are when they need classes. Please see prior discussion. We are great.

c) Partnerships (internal and external)

Externally ECE@COS is a recognized model of collaboration. In a huge county, with few people, agencies learn to work together

d) Innovation and implementation of best practices

In early education, Best Practice is embedded in everything that we do. The educational philosophies that we teach in our classes guide our work as educators. Assessment, Observation and Evaluation are as central to each class session as they are to our students' work with children and families.

e) Efficiency in operations

We are efficient. See our budget and class scheduling.

f) Efficiency in resource use

See above.

g) Staffing

Please see 4. PIVOT Assignment Type

h) Participation in shared governance (e.g., do unit members feel they participate effectively in planning and decision-making?)

- Early Childhood Education and Child Development (ECE)
- Patrice Thatcher-Stephens, Program Coordinator

The Program Coordinator has a long history of active and involved participation in shared governance. Adjunct Instructor and Program Coordinator interact often and meet each semester to plan and assess.

i) Professional development and training

Through professional organizations, NAEYC, CDTC, PITC, ESTEM, QRIS, Head Start, CCCECE and others the Program Coordinator and Adjunct Instructors remain current and active in local, state professional development.

j) Compliance with applicable mandates

The ECE Program is currently in compliance with internal and external program mandates.

7. Vision. Tell us your unit's vision: Where would you like your program to be four years from now? Dream big while considering any upcoming changes (e.g., new buildings, labs, growth, changes in the discipline, etc.)

We visualize that the Child Development, Family and Education Program will maintain its role as an aligned and committed member of the CCC ECE community. We will continue to serve our students, and the children and families in Siskiyou County and to collaborate with the myriad of agencies that are part of our network.

We aligned and mapped our courses to allow us to serve students within the context of workforce development which is heavily invested in alignment and mapping. Our core course will remain constant. However, as the field grows and expands to meet greater demand, both for services and for skills, we will add additions course of study options to meet, those needs.

Currently, our most significant goal for ECE@COS is supporting the Siskiyou Child Care Council-Discovery Child Development Center's NAEYC Accreditation. That process encapsulates the creation of a functioning Lab School and effective Distance Learning hub. Success is not guaranteed. If we do not achieve accreditation, the MOU should not be renewed.

8. Progress on Prior Goals: Briefly summarize any progress your unit has made in meeting the goals and objectives identified in the program's last Four-Year Action Plan.

My responses regarding previous Comprehensive Program Review Goals are below in blue.

- OEI Training and Program Preparation per above with an extended timeline. The long-term goal is to translate ECE@COS into an online degree program while maintaining Best Practice, enrollment, and locally relevant community involvement. This includes FTF/VC classes as appropriate.
  Our DL structure is strong, and we do not intend to pursue OEI alignment. Please see our survey of student locations and our conclusions.
- Align our Core Courses to the ECE Competencies Mapping Tool per above. This initiative is vital to meeting ECE Guided Pathways goals and is fully funded and pending per gridlocked contract negotiations.
  DONE
- Meet ECE@COS' MOU obligation to Maintain Discovery Child Development Center NAEYC Accreditation.
  This is stalled. Our collaboration with Siskiyou Child Care Council does not need these standards.
- Maintain materials and equipment necessary to demonstrate Best Practices in Early Education in Lecture and Lab classes

- Early Childhood Education and Child Development (ECE)
- Patrice Thatcher-Stephens, Program Coordinator
  DONE
- Accommodate and assimilate ECE@COS Program as the State of California realigns its K-12/Early Education Plan per Master Plan for Early Learning and Care
  We are waiting to see where the Universal Prekindergarten Initiative and the Child Development Permit Work Group takes us in the coming year. This has been in process since before 2017.
  Child Development Permit Matrix Update 2024

9. 2025-2026 Long Range Planning Goals formulated to maintain or enhance program strengths and to address identified challenges.

- Resolve Smart Classroom issues in COS Building 9
- Maintain materials and equipment necessary to demonstrate Best Practices in Early Education in Lecture and Lab classes.
- Resolve inefficiencies in current MOU collaboration with Siskiyou Child Care Council.
- Accommodate and assimilate ECE@COS Program as the State of California realigns its K-12/Early Education Plan per Master Plan for Early Learning and Care

10. Closing the Loop

In the last budget cycle, I believe that our CQUIPS we not approved. We did complete, somewhat successfully, approvals from previous years. During the 2023-2024 Academic Year the Finance Office was in transition, and later in the cycle, the Career and Technical Education's budget process was in affected by Perkins and Strong Workforce funding changes.

We certify that the ECE@COS Program Review process included broad dialogue about student learning, program effectiveness, and resource allocation.

Patrice Thatcher-Stephens
