Comprehensive Program Review Two-Year Cycle
Certified Nurse Assistant
Rhonda Brown, DSD Faculty
Cora Brownell, Director
December 2018

I. Description of the Program: this course teaches state approved CNA curriculum that includes theory, skills lab and clinical experience to acquire the necessary skills and knowledge for the state certification exam.

a) Organization

Director of Nursing- ***Cora Brownell MSN, RN***

Instructor (FT)- ***Rhonda Brown MSN, RN*** Theory and Skills Lab Instructor, Director of Staff Development (DSD) certificate	**Instructor (A)-*****Denise Wheeler RN*** Theory and Skills Lab Instructor, Director of Staff Development (DSD) certificate	**Instructor (A)** ***Eric Ricohermoso RN*** Clinical and Skills Lab Instructor, Director of Staff Development (DSD) certificate

Instructor (A)- ***Penny Huleatt RN*** Clinical and Skills Lab Instructor	**Instructor (A)-** ***Bill Handshy RN*** Clinical Instructor

b) Primary purpose: To provide a state recognized certificate for the graduated student to be able to seek entry level employment in the health care field.

c) Whom we serve include demographics

The program serves the local community of Siskiyou and Shasta counties.

Data is for all Nursing. Specific CNA Data is not available at this time.

Row Labels	Count of Student_Race
NURS	**1268**
African American	6
American Indian/Alaskan Native	46
Asian	22
Filipino	19
Hispanic	91
Native Hawaiian/Pacific Islander	6
Other/Unknown	89
Two or more	125
White	864
Grand Total	**1268**

201550, 201650, 201750, 201830	Count of Student_Gender
NURS9062	
F	57
M	4
N	0
Unknown / Not Collected	0
Grand Total	**61**

d) What kind of services we provide:

- State approved CNA theory, skills training, and clinical training.
- On site state approved CNA testing for licensing.
- Certificates Awarded

Year	Certified Nurse Assistant
2015	14
2016	27
2017	25
2018	18

e) How services are provided:

- Credit courses- A mix of FT faculty and adjunct faculty offer course offerings.
- FTES analysis of prior two years; Data not available

f) Curriculum Current and needs based:

Curriculum updated Spring 2018 per accreditation board regulation. Additional ten hours of theory in content areas of dementia, mental illness and abuse.

Course Evaluation Data 2017-18

Course Listing	Degree Applicable	Transferable	Satisfaction Survey Results
NURS9062	**no**	**no**	**98% satisfied**

g) Class Breakdown:

Course	MODALITY	TIME	FIRST DAY ENROLLMENT	LAST DAY ENROLLMENT	COMPLETION	SUCCESS
NURS9062	Face to Face		**201550-14** **201650-27** **201750-25** **201830-18**	**201550-14** **201650-27** **201750-25** **201830-18**	**100%** **100%** **100%** **100%**	**100%** **100%** **100%** **100%**

II. External Factors with Significant Impact

a) Budgetary constraints or opportunities: Arthur N. Rupe Grant (RUPE) supports with student expenses. The dollar amount of the grant varies from year to year.

b) Competition from other institutions: Shasta College offers a CNA program.

c) Requirements for four -year institutions: N/A

d) Institutional regulation, policies, standards, and other mandates:
CDPH faculty minimum requirements impact our ability to hire qualified instructors in the past with clinical experience in a skilled nursing facility for at least two years of dir4ect patient care. The regulation was amended this year to include other clinical nursing experience to qualify faculty.

e) Non-Institutional regulation, policies, standards, and other mandates:

- Clinical site partners do not charge fees for our students practicing in their facilities.

f) Job market

- **Requirements of prospective employers:** CNA certificate in good standing.
- **Development in field:** High need for this level of health care nationwide.

III. Progress on Outcomes Assessment:

Program Outcomes

Upon completion of this course, the student should be able to:

1. Summarize hospitals functions and the roles and responsibilities of the Certified Nurse Assistant within the hospital.

2. Evaluate the personal and interpersonal skills necessary in the provision of care for the ill and the aged.

3. Use appropriate protocol to prevent accidents and injury to both resident and care provider and participate in the management of emergencies and unusual occurrences.

4. Identify 5 patient rights specific to residents in a long term care facility, and provide examples of violations of such rights.

5. Identify and demonstrate guidelines and precautions to use when lifting and moving the resident.

6. Apply the principles of infection control, utilizing Universal Precautions to reduce the transmission of infectious agents.

7. Compare and contrast the units of measurement in health care.

8. Assess and implement the personal care needs of a variety of residents utilizing the established plan of care.

9. Select the correct methodology in performing supportive patient care procedures.
10. Differentiate between normal and abnormal vital signs and factors that affect the normal ranges.
11. Define a well-balanced diet and assess the resident's need for adjustments in meal type.
12. Initiate immediate and temporary intervention when identifying signs and symptoms of distress in the resident.
13. Construct basic care procedures focused on the common health disorders frequently found in long term care, noting the psychological, social, cultural, and recreational needs accompanying those disorders.
14. Define the 5 types of rehabilitative therapy commonly used in long term care facilities and the impact each can have in promoting the resident's potential.
15. Observe and report changes in the resident's physical and emotional condition and document these findings according to legal requirements/guidelines.
16. Differentiate the psychological and cultural aspects of caring for the chronically/terminally ill resident and meet the needs of the resident's family.

SLO Assessment Initialization Year 2018-19:

CNA OUTCOME GUIDE
NURS 9062

MAJOR CONCEPTS	SKILL SETS	KEY ASSESSMENT TASKS	INTENDED OUTCOME
✓ Accurate measurement of vital signs. ✓ Differentiate between normal and abnormal measurements.	• Measurement of vital signs • Measurement of liquids • Measurement of food portions.	1. Students will demonstrate the ability to measure, record, document, and report all measurements within the scope of practice of a CNA.	1. Demonstrate a broad base of nursing assistant knowledge in order to report abnormal findings to the nurse.

b. Program's assessment plan for next two years:

Year	Task on Planning Day at beginning of year	Task on Planning Day at end of year
Year 1 (2019-2020)	**Finalize 1st key assessment**	**Analyze results of 1st key assessment**

Year 2 (2020-2021)	**Finalize 1st key assessment**	**Analyze results of 1st key assessment**

IV. Institutional Program Effectiveness Indicators:
SEE GRAPH UNDER I(g).

c.) FT/PT Faculty Ratio/Impact on Student Success: Most cohorts are scheduled in summer session. Adjunct faculty teaches the course.

V. Other Unit-Specific Quantitative/Qualitative Research

N/A

VI. Evaluation

a) **Representativeness of population served see I (e)**
b) **Alternative modes and schedules of delivery:** Canvas augmented classes. Hi fidelity skills/simulation lab

Partnerships: COMMUNITY CLINICAL SITES; Shasta View Estates Skilled Nursing Facility.

c) **Innovation and Implementation of best practices:** Clinical skills lab hours were added to the curriculum Spring 2018.
d) **Efficiency in operations:**. Due to requests from local agencies, COS Nursing began building up the Certified Nursing Assistant Program to have admissions both in spring and fall on the main Yreka campus, starting in spring 2018. At the same time, a second section in both spring and summer in Alturas in Modoc County dropped away when the Modoc hospital achieved California Department of Public Health approval to run the course on its own. Student completion in the combined sections had reached an all-time high of 23 graduates in summer 2017, however once Modoc discontinued with COS, the spring 2018 student completion total dropped to 17. Lower enrollment impacts the efficiency of operations. There is a fine balance in student numbers for CNA since higher enrollment requires more adjunct clinical instructors.
e) **Efficiency in resource use:** We continue to evaluate resource allocation whether it be staffing or supplies to improve the nursing cost effectiveness.

f) **Staffing**

COURSE	ADJUNCT	FULL TIME	GRAND TOTALS
201550 TOTALS			
NURS 9062	3		3
201650 TOTALS			
NURS9062	4		4
201750 TOTALS			
NURS9062	4		4
201830 TOTALS			**2**
NURS9062	1	1	2

Participation in shared governance:

a) **Professional development and training:** Faculty are afforded additional on campus and out of town trainings.

a) Compliance with applicable mandates: All faculty comply with BRN licensing CPR, and immunization requirements.

I. Vision

Continue to offer an excellent CNA program to meet the needs of our community and partners.

II. Progress on Prior Goals: The new CNA curriculum was launched In Spring 18. The program was re-evaluated in summer 2018 and appropriate changes were made to meet the need of the students and to keep current with trends and evidenced-based best practice standards.

III. Two-year Action Plan:

- Continue to deliver a quality rigorous academic and clinical nursing program to produce excellent new CNA graduates..
- . Continue to evaluate students' needs and nursing budget dollar allocation for continued student success.

We the undersigned certify that the LVN-RN Step-Up Program, program review process included broad dialogue about student learning, program effectiveness and resource allocation.
